NOTES FROM THE AUTHORS

ALGEBRA WITH PIZZAZZ! in a Binder is designed to provide practice with skills and concepts taught in first-year algebra courses. The series is an extension and continuation of the *PRE-ALGEBRA WITH PIZZAZZ!* series, also published by Creative Publications.

We believe that mastery of algebra skills and concepts requires both good teaching and a great deal of practice. Our goal is to provide puzzle activities that make this practice more effective. We have tried to build into these activities three characteristics that increase the effectiveness of practice.

1. KNOWLEDGE OF RESULTS

Various devices are used in the puzzles to tell students whether their answers are correct. Feedback occurs immediately after the student works each exercise. For example, if a particular answer is not in the code or scrambled answer list, the student knows it is incorrect. He or she can then try again or ask for help. Additional feedback and reinforcement occurs when the student finds a puzzle solution that is appropriate. We have found that students greatly appreciate and benefit from this immediate knowledge of results.

2. CONTROL OF EXERCISE VARIATION AND DIFFICULTY

The puzzles within each major topic are carefully sequenced so that each one builds on skills and concepts previously covered. Each puzzle focuses on a specific objective. The sequence of exercises within each puzzle is designed to guide students in incremental, step-by-step fashion toward mastery of the objective. Exercises that depart substantially from this incremental development, or that require extraordinary insight, have not been included. On the other hand, the exercises provide enough variety and challenge to hold the students' interest and to represent the skill or concept fairly. Our goal is student success. That is, after a reasonable period of explanation and examples, students will be able to do the exercises and thereby achieve the objective at a respectable level.

3. A MOTIVATING GOAL FOR THE STUDENT

The puzzles are designed so that students will construct a joke or unscramble the answer to a riddle in the process of checking their answers. The humor operates as an incentive, because the students don't get the punch line until they complete the exercises. While algebra students sometimes decry these jokes as "dumb" or even "very dumb," our experience has been that students usually look forward to solving the puzzles and that they do enjoy the jokes and riddles. In addition, the variety and novelty of procedures for solving the puzzles help capture student interest. By keeping scrambled answer lists short and procedures simple, we have tried to minimize the time spent on finding answers or doing other puzzle mechanics.

In addition to these efforts to make the puzzles effective, we have tried to make them easy to use. The objective for each puzzle is given both at the bottom of the puzzle page and in the table of contents. The major topic divisions and specific objectives correspond to those in widely-used algebra textbooks. Nearly every puzzle requires duplicating only one page. Finally, because the puzzles are self-correcting, they can eliminate the task of correcting assignments.

We hope that you will find the teaching of algebra, and your students the learning of algebra, less difficult and more fun with these puzzles.

Steve and Janis Marcy

TABLE OF CONTENTS AND OBJECTIVES

BOOK A

1. INTRODUCTION TO ALGEBRA

a.	Evaluate variable expressions.....	1
b.	Apply rules for order of operations; evaluate variable expressions.....	2
c.	Simplify or evaluate expressions with grouping symbols.....	3
d.	Recognize applications of the commutative and associative axioms.....	4
e.	Use the distributive axiom to multiply or factor expressions.....	5
f.	Simplify expressions by combining like terms (all positive terms).....	6
g.	Simplify expressions containing parentheses (all positive terms).....	7
h.	Evaluate expressions containing exponents.....	8
i.	Determine if a given value is a solution of an open sentence.....	9
j.	Translate English phrases into algebraic expression.....	10

2. OPERATIONS WITH INTEGERS

a.	Add integers represented by arrows on a number line.....	11
b.	Add integers.....	12
c.	Use opposite and absolute values of integers.....	13
d.	Use several integers; solve word problems involving addition of integers.....	14
e.	Multiply integers.....	15
f.	Multiply integers (including factors with exponents).....	16
g.	Add or multiply integers (review).....	17
h.	Subtract integers.....	18
i.	Divide integers.....	19
j.	Add, multiply, or divide integers (review).....	20
k.	Perform all four operations with integers (review).....	21

3. VARIABLES, EXPRESSIONS, AND FORMULAS

a.	Simplify expressions by combining like terms.....	22
b.	Simplify and then evaluate expressions.....	23
c.	Simplify expressions containing parentheses.....	24
d.	Simplify expressions that require adding or subtracting a binomial.....	25
e.	Simplify and evaluate expressions containing parentheses.....	26
f.	Evaluate formulas.....	27

4. SOLVING EQUATIONS AND WORD PROBLEMS

a.	Solve equations of the form $x + a = b$ (terms in each equations are added).....	28
b.	Solve equations of the form $x + a = b$ (terms are added or subtracted).....	29
c.	Solve word problems using equations like those on pages 28-29.....	30
d.	Solve equations of the form $ax = b$, where a is an integer or unit fraction (solutions are integers).....	31
e.	Solve equations of the form $ax = b$, where a is an integer or unit fraction (solutions are not necessarily integers).....	32
f.	Solve equations of the form $ax = b$, where a is an integer or fraction.....	33

g.	Solve equations of the form $ax + b = c$, where a is an integer (solutions are integers).....	34
h.	Solve equations of the form $ax + b = c$, where a is an integer (solutions are not necessarily integers).....	35
i.	Solve equations of the form $ax + b = c$, where a is an integer or unit fraction.....	36
j.	Solve word problems using equations like those on page 36	37
k.	Solve equations of the form $ax + b = c$, where a is an integer or fraction	38
l.	Solve word problems using equations like those on page 38	39
m.	Solve equations containing parentheses.....	40
n.	Solve equations having the variable in both sides	41
o.	Solve equations containing parentheses and having the variable in both sides	42

5. SOLVING WORD PROBLEMS

a.	Solve word problems involving two numbers	43
b.	Solve world problems involving two or three numbers	44
c.	Solve word problems involving perimeter.....	45
d.	Solve word problems involving perimeter (more challenging problems)	46
e.	Solve word problems involving consecutive integers	47
f.	Solve word problems using equations like those on pages 41-42	48
g.	Solve word problems like those on page 48 (more challenging problems)	49
h.	Solve word problems involving ages	50
i.	Solve word problems involving ages (more challenging problems)	51
j.	Solve assorted word problems (review)	52

6. ADDITIONAL PRACTICE FOR SELECTED OBJECTIVES

a.	Additional practice for Objective 2–k (page 21).....	53
b.	Additional practice for Objective 4–h (page 35)	54
c.	Additional practice for Objective 4–k (page 38).....	55
d.	Additional practice for Objective 4–o (page 42)	56
e.	Additional practice for Objective 5–b (page 44)	57

7. TEST OF GENIUS58

8. SOLUTIONS233

TABLE OF CONTENTS AND OBJECTIVES

BOOK B

1. POLYNOMIALS

a.	Write or evaluate exponential expressions.....	59
b.	Simplify polynomials by combining like terms	60
c.	Add polynomials	61
d.	Subtract polynomials	62
e.	Multiply monomials.....	63
f.	Find powers of a monomial	64
g.	Add, subtract, or multiply monomials (review).....	65
h.	Multiply or find powers of monomials (review)	66
i.	Add, subtract, multiply, or find powers of monomials (review).....	67
j.	Multiply a polynomial by a monomial.....	68
k.	Multiply polynomials	69
l.	Solve word problems involving area (quadratic terms cancel)	70

2. MORE WORK WITH FORMULAS AND WORD PROBLEMS

a.	Evaluate formulas.....	71
b.	Solve a formula for a given variable (formulas have no variables in the denominator)	72
c.	Solve word problems involving money	73
d.	Solve word problems involving uniform motion	74
e.	Solve word problems involving uniform motion (more challenging problems)	75

3. FACTORING POLYNOMIALS

a.	Divide monomials	76
b.	Divide a polynomial by a monomial	77
c.	Find a missing factor of a monomial.....	78
d.	Identify factors of a monomial	79
e.	Factor a polynomial as the product of its greatest monomial factor and another polynomial (polynomials in one variable)	80
f.	Factor a polynomial as the product of its greatest monomial factor and another polynomial (polynomials in one or two variables)	81
g.	Multiply binomials mentally	82-83
h.	Simplify products of the form $(a + b)(a - b)$; factor differences of squares.....	84
i.	Find squares of binomials; recognize trinomial squares	85
j.	Find squares of binomials; factor trinomial squares	86
k.	Factor completely a polynomial that has as a factor a difference of squares or a trinomial square	87
l.	Factor trinomials of the form $x^2 + bx + c$, where c is positive	88
m.	Factor trinomials of the form $x^2 + bx + c$, where c is negative	89
n.	Factor trinomials of the form $x^2 + bx + c$, where c is positive or negative (review)....	90
o.	Factor trinomials of the form $ax^2 + bx + c$, where a is a positive integer greater than 1	91-92

p.	Factor trinomials using the methods on preceding pages (review)	93
q.	Factor polynomials completely (excludes factoring by grouping).....	94-95
r.	Factor a polynomial whose terms contain a common binomial factor	96
s.	Factor polynomials by grouping	97
t.	Factor polynomials completely (includes factoring by grouping)	98
u.	Factor polynomials completely (polynomials with factors of the form $ax^2 + bxy + cy^2$)	99
v.	Factor polynomials completely (review of all types on preceding pages)	100

4. SOLVING EQUATIONS AND WORD PROBLEMS BY FACTORING

a.	Solve equations when one side is in factored form and the other side is 0.....	101
b.	Solve quadratic equations by factoring (equations in standard form)	102
c.	Solve quadratic equations by factoring (equations in standard form)	103
d.	Solve polynomial equations of degree three or four by factoring	104
e.	Solve word problems involving squares of numbers or consecutive integers	105
f.	Solve word problems involving area.....	106

5. SIMPLIFYING ALGEBRAIC FRACTIONS

a.	Simplify algebraic fractions (both numerator and denominator written in descending order of exponents with first coefficient positive)	107
b.	Simplify algebraic fractions (numerator and/or denominator not written in descending order of exponents with first coefficient positive)	108
c.	Simplify algebraic fractions (numerator and denominator contain monomial factors)	109
d.	Simplify algebraic fractions (review of preceding three pages)	110
e.	Multiply algebraic fractions.....	111
f.	Multiply algebraic fractions (more challenging exercises)	112
g.	Divide algebraic fractions.....	113
h.	Simplify products and quotients involving three algebraic fractions	114

6. VOCABULARY REVIEW

a.	Demonstrate knowledge of basic vocabulary used in first-semester algebra.....	115
----	---	-----

7. TEST OF GENIUS.....

116

8. SOLUTIONS.....

233

TABLE OF CONTENTS AND OBJECTIVES

BOOK C

1. COMBINING ALGEBRAIC FRACTIONS

- a. Add algebraic fractions with like denominators.....117
- b. Add algebraic fractions with unlike monomial denominators
(excluding unlike powers)118
- c. Add algebraic fractions with unlike monomial denominators
(including unlike powers)119
- d. Add algebraic fractions with polynomial denominators120
- e. Subtract algebraic fractions121
- f. Simplify mixed expressions122

2. POLYNOMIAL DIVISION

- a. Divide a polynomial by a binomial123
- b. Divide a polynomial by a binomial (more challenging exercises)124

3. APPLYING ALGEBRAIC FRACTIONS

- a. Express a ratio or rate in simplest form125
- b. Solve word problems involving ratios126
- c. Solve proportions127
- d. Solve word problems using proportions128
- e. Solve equations with fractional coefficients129
- f. Solve word problems using equations like those on page 129130
- g. Solve fractional equations (solving a quadratic equation is not required)131
- h. Solve fractional equations (solving a quadratic equation may be required)132
- i. Find a percent of a number133
- j. Find a percent of a number; find what percent one number is of another;
or find a number given a percent of the number134-135
- k. Solve word problems involving percents136
- l. Solve word problems involving the percent of increase or decrease in a quantity ..137

4. MORE WORK WITH FORMULAS AND WORD PROBLEMS

- a. Solve a formula for a given letter (formulas may have variables
in the denominator)138
- b. Solve word problems involving investments139
- c. Solve word problems involving investments (more challenging problems)140
- d. Solve word problems involving dry mixtures141
- e. Solve word problems involving liquid mixtures142
- f. Solve word problems involving work143

5. LINEAR EQUATIONS IN TWO VARIABLES AND GRAPHING

- a. Locate a point in a coordinate plane given its coordinates144
- b. Determine whether a given ordered pair is a solution of an equation
in two variables145

c.	Find ordered pairs that satisfy a linear equation and use them to graph the equation (equations are solved for y)	146-147
d.	Solve an equation for y in terms of x	148
e.	Find ordered pairs that satisfy a linear equation and use them to graph the equation (equations are not solved for y)	149
f.	Find the x -intercept and the y -intercept of the graph of a linear equation and use them to graph the equation	150-151
g.	Find the slope of a line given two points on the line (using the graph)	152
h.	Find the slope of a line given two points on the line (not using the graph)	153
i.	Find an equation of a line given two points on the line (using the graph)	154
j.	Graph a line given its equation in slope-intercept form	155
k.	Find the slope and y -intercept of a line, given its equation	156
l.	Graph a line given its equation (excludes vertical lines)	157
m.	Graph a line given its equation (includes vertical lines)	158
n.	Find an equation of a line given the slope and one point on the line	159
o.	Find an equation of a line given two points on the line (not using the graph)	160
6.	SYSTEMS OF LINEAR EQUATIONS IN TWO VARIABLES	
a.	Solve systems of equations by graphing	161-162
b.	Solve systems of equations by the substitution method	163
c.	Solve systems of equations by the addition method (no multiplication is required)	164
d.	Solve systems of equations by the addition method (multiplication by -1 may be required)	165
e.	Solve word problems using systems of equations like those on pages 163-165	166
f.	Solve systems of equations using multiplication with the addition method (equations are in standard form)	167
g.	Solve systems of equations using multiplication with the addition method (equations are not necessarily in standard form)	168
h.	Solve word problems using systems of equations like those on page 167	169
7.	SOLVING WORD PROBLEMS USING SYSTEMS OF EQUATIONS	
a.	Solve word problems involving uniform motion in a current	170
b.	Solve word problems involving ages	171
c.	Solve word problems involving the digits of a number	172
d.	Solve assorted word problems (more challenging problems)	173
8.	TEST OF GENIUS	174
9.	SOLUTIONS	233

TABLE OF CONTENTS AND OBJECTIVES

BOOK D

1. FUNCTIONS AND THEIR GRAPHS

- a. Determine whether or not a relation is a function175
- b. Find values of a function; find the range of a function for a given domain176
- c. Describe how real-world functional relationships can be represented by graphs, using concepts such as slope, domain, range, and initial conditions177-178
- d. Sketch the graph of a function using knowledge of real-world relationships179
- e. Graph quadratic functions and compare them to a linear function180
- f. Find the constant of variation and write an equation expressing direct variation181
- g. Graph equations expressing direct variation182
- h. Solve word problems involving direct variation183
- i. Find the constant of variation and write an equation expressing inverse variation .184
- j. Graph equations expressing inverse variation185
- k. Solve word problems involving inverse variation.....186
- l. Solve word problems involving direct or inverse variation as a square187
- m. Write a formula expressing joint and/or combined variation.....188

2. INEQUALITIES

- a. Identify the graph of the solution set of an inequality189
- b. Solve inequalities of the form $ax + b > c$, where a is an integer190
- c. Solve inequalities of the form $ax + b > c$, where a is an integer or fraction191
- d. Solve inequalities containing parentheses and/or having the variable in both sides192
- e. Identify the graph of the union or intersection of two sets expressed as inequalities193-194
- f. Identify the graph of the solution set of a combined inequality.....195
- g. Solve equations and inequalities involving absolute value.....196
- h. Graph linear inequalities in two variables (inequalities are solved for y)197
- i. Graph linear inequalities in two variables (inequalities are not necessarily solved for y).....198-199
- j. Solve systems of linear inequalities in two variables by graphing.....200

3. RATIONAL AND IRRATIONAL NUMBERS; RADICAL EXPRESSIONS

- a. Express a fraction as a repeating or terminating decimal; express a repeating decimal as a fraction in lowest terms201
- b. Find the square roots of numbers and expressions that have rational square roots202
- c. Demonstrate understanding of basic concepts and vocabulary related to the set of real numbers.....203
- d. Simplify square roots of numbers that have perfect square factors204
- e. Find the length of a side of a right triangle using the Pythagorean property205
- f. Solve word problems using the Pythagorean property.....206

g.	Simplify square roots with variables in the radicand (assuming that all variables represent nonnegative numbers)	207
h.	Simplify square roots with variables in the radicand (assuming that all radicands, but not necessarily all variables, are nonnegative)	208
i.	Simplify products of radicals	209
j.	Simplify sums and differences of radicals	210
k.	Simplify quotients containing radicals by rationalizing the denominator	211
l.	Simplify products, sums, differences, and quotients containing radicals (review of preceding three pages)	212
m.	Simplify square roots of fractions; simplify products of radicals with fractional radicands	213
n.	Simplify sums and differences of radicals with fractional radicands	214
o.	Multiply binomials containing radicals	215
p.	Solve radical equations (solving a quadratic equation is not required)	216
q.	Solve radical equations and word problems that lead to radical equations (solving a quadratic equation may be required)	217

4. QUADRATIC FUNCTIONS; WORD PROBLEMS AND FORMULAS

a.	Solve quadratic equations using perfect squares	218
b.	Solve quadratic equations using perfect squares (more challenging exercises)	219
c.	Solve quadratic equations by completing the square	220
d.	Solve quadratic equations using the quadratic formula	221
e.	Solve quadratic equations using the quadratic formula (more challenging exercises)	222
f.	Use the related graph or the discriminant of a quadratic equation to determine how many real-number solutions it has	223
g.	Solve word problems involving areas of rectangles	224
h.	Solve assorted word problems using quadratic equations	225
i.	Solve a formula for a given letter (either squaring both sides or taking the square root of both sides is necessary)	226

5. INTRODUCTION TO TRIGONOMETRY

a.	Give the sine, cosine, and tangent of an acute angle of a right triangle	227
b.	Use a table of trigonometric ratios	228
c.	Use trigonometric ratios to find lengths of sides of right triangles	229
d.	Use trigonometric ratios to find measures of angles of right triangles	230

6. VOCABULARY REVIEW

a.	Demonstrate knowledge of basic vocabulary used in second-semester algebra	231
----	---	-----

7. TEST OF GENIUS

232

8. SOLUTIONS

233

NOTES ABOUT USING THE PUZZLES

ALGEBRA WITH PIZZAZZ! in a Binder is designed to be used in conjunction with an algebra textbook. There are puzzles for most of the skills and concepts traditionally included in a first-year algebra course. The exercises are quite similar to those in standard textbooks, and have been organized with careful attention to sequencing and level of difficulty. After students have received instruction in a topic and have worked some sample exercises, you might assign a puzzle along with a selection of textbook exercises.

The series is not intended to offer “extra enrichment,” in the sense of including topics beyond traditional course objectives, but rather to be an integral part of the basic algebra curriculum. Indeed, you may wish to use the series as your primary source of exercise sets for a complete algebra course.

If you are awarding credit for puzzle assignments, you may wish to have the students show all their work on a separate sheet of paper or on the back of the puzzle page. Setting standards regarding neatness, labeling of exercises, and so on, will promote legible and well-organized work. If the work for a particular puzzle can be done mentally, you may wish to have the students write a complete list of answers. Encourage them to write each answer *before* locating it in the answer list.

One advantage of using a puzzle as an assignment is that you can easily make a transparency of the page and display the exercises without having to recopy them on the board. You can then point to parts of a problem as you discuss it. It is often helpful to cut the transparency apart, so that you can display exercises on part of the screen and write solutions on the remaining area.

Other books by Steve and Janis Marcy
published by Creative Publications

Middle School Math With Pizzazz! Series

- Book A: Operations with whole numbers
- Book B: Decimals and percent
- Book C: Fractions; Number theory
- Book D: Measurement; Geometry
- Book E: Probability; Statistics; Integers; Equations

Pre-Algebra With Pizzazz! Series

- Part AA: Operations with positive and negative numbers; Properties of operations
- Part BB: Exponents; Decimals; Scientific notation; irrational numbers; Ratio, proportion, and percent; Probability
- Part CC: Geometric figures; Measurement; Square roots; Pythagorean property; Trigonometric ratios; Statistics
- Part DD: Variables and expressions; Equations; Problem solving; Inequalities; Functions and graphing

DOUBLE CROSS

1. What do you get when you cross a porcupine with a gopher?

20 0 22 81 81 62 1 7 32 0 60 1 62 20 24 26

2. What do you get when you cross a pelican with a lightning bolt?

20 100 32 8 62 1 62 90 0 5 32 90 100 32 1 1

TO DECODE THE ANSWERS TO THESE TWO QUESTIONS:

Evaluate each expression below using the values

$$a = 1, b = 2, c = 3, w = 0, x = 10, \text{ and } y = 6.$$

Each time your answer appears in the code, write the letter of that exercise above it.

(H) xy

(A) $b + (cy)$

(W) $x - (ac)$

(S) $(7b) + (4c)$

(E) $(8x) - (3y)$

(U) $(ax) + (by)$

(B) $(2x) \cdot (b + c)$

(G) $\frac{(x + y)}{(c - a)}$

(R) $\frac{(xy)}{(x + b)}$

(T) $\frac{(wa)}{b}$

(K) $(x - y) \cdot (y - w)$

(N) $c \cdot (y + c) \cdot (y - c)$

(C) $\frac{(3x)}{b} \cdot (abc)$

(I) $(8bc) - (w + x + y)$

(L) $\frac{(x - b)}{(y + b)}$

Why Should You Look Out for a Pig That Knows Karate?

Simplify or evaluate each expression below, as directed. Find your answer in the corresponding answer column. Write the letter of the exercise in the box that contains the number of the answer.

SIMPLIFY:

I $4 \cdot 9 + 1$

T $6 + 7 \cdot 10$

U $42 - 2 \cdot 7$

O $8 + 50 \div 2$

E $(10)(3) - 4$

G $2 \cdot 8 + 3 \cdot 5$

A $\frac{60}{3} - (2)(4)$

T $5 \cdot 12 + \frac{32}{16}$

Y $3 + 2 \cdot 5 \cdot 8$

I $(4)(6)(3) - 20 + 1$

O $18 \div 2 \times 3$

R $3 \cdot 3 + 4 \cdot 4 - 5 \cdot 5$

Why Did Simeon Wrench Sleep Under His Car?

Simplify or evaluate each expression below, as directed. Find your answer at the bottom of the page and write the letter of that exercise below it.

SIMPLIFY:

- E $8 + (9 \cdot 3)$
 I $(8 + 9) \cdot 3$
 A $14(10 \div 2)$
 Y $(12 \cdot 3) - (9 \cdot 2)$
 T $(4 \cdot 10) + (75 \div 25)$
 E $\frac{80 - 3}{8 + 3}$
 P $13 + [2(9 - 6)]$

SIMPLIFY:

- A $\frac{12 + 8}{12 - 2} + \frac{8}{2}$
 O $3[5(48 \div 12)]$
 T $\frac{50 - [3(7 - 1)]}{2}$
 H $[4(30 - 5)] \div \frac{10}{2}$
 E $\frac{12(15 \div 3)}{(20 \cdot 5) - (20 \cdot 2)}$
 D $5 + [4 \cdot 3(2 + 1)]$
 W $\left[\frac{6 \cdot 2(8 - 3)}{11 + 4} \right] \cdot 6$

EVALUATE if

- $a = 1$ $m = 3$ $x = 6$
 $b = 2$ $n = 10$ $y = 0$
- K $\frac{7m + 1}{b}$
 N $(3n - 2m)(a + b)$
 L $\frac{2(n + x)}{n - x}$
 U $x[b(m + 1) - 3]$
 W $\frac{mn - 5y}{a + b}$
 O $(n - a)(n - b)(n - m)(n - n)$

Why Are Handcuffs Like Souvenirs?

Use the distributive property to complete each statement below. Find your answer in the corresponding answer column. Write the letter of that exercise in the box that contains the number of the answer.

- Answers:
- (A) $7(a + b) = 7a + \underline{\hspace{1cm}}$
 (R) $4(5 + x) = 20 + \underline{\hspace{1cm}}$
 (Y) $3(2x + 9) = 6x + \underline{\hspace{1cm}}$
 (S) $8(3x + 1) = \underline{\hspace{1cm}} + 8$
 (O) $a(4 + b) = \underline{\hspace{1cm}} + ab$
 (E) $x(y + 10) = \underline{\hspace{1cm}} + 10x$
 (I) $2(7x + 4y) = 14x + \underline{\hspace{1cm}}$
 (D) $6(9 + 5x) = 54 + \underline{\hspace{1cm}}$
 (W) $x(a + 3b) = \underline{\hspace{1cm}} + 3bx$
 (E) $a(8x + 2y) = 8ax + \underline{\hspace{1cm}}$
 (T) $\frac{1}{2}(4a + 10) = 2a + \underline{\hspace{1cm}}$
 (R) $\frac{2}{3}(12 + 9y) = 8 + \underline{\hspace{1cm}}$

- Answers:
- (O) $5x + 5y = 5(x + \underline{\hspace{1cm}})$
 (T) $9a + 9b = 9(\underline{\hspace{1cm}} + b)$
 (W) $4m + 4n = \underline{\hspace{1cm}}(m + n)$
 (H) $ab + 3a = a(b + \underline{\hspace{1cm}})$
 (E) $xy + 15x = \underline{\hspace{1cm}}(y + 15)$
 (A) $bu + uv = \underline{\hspace{1cm}}(b + v)$
 (F) $\frac{2}{5}m + \frac{2}{5}n = \frac{2}{5}(\underline{\hspace{1cm}} + n)$
 (M) $\frac{3}{4}a + \frac{3}{4}b + \frac{3}{4}c = \underline{\hspace{1cm}}(a + b + c)$
 (S) $7ax + 2ay = a(7x + \underline{\hspace{1cm}})$
 (T) $4kx + 11ky = \underline{\hspace{1cm}}(4x + 11y)$
 (R) $3ay + 8by = y(\underline{\hspace{1cm}} + 8b)$

DAFFYNYTION DECODER

1. Lumberjack:

-22 11 -2 -2 -34 -17 25 13 -22 25 -144 -22 1328 -17

2. Quartz watch:

336 -2 -2 1328 49 25 -12 -22 -29 18 49 336 1328

3. First aid instructor:

11 49 -45 -22 -5 -34 -2 -54 -12 -22 -360 -45 -17

TO DECODE THESE THREE DAFFYNYTIONS:

Do each exercise below and find your answer in the code. Each time the answer appears in the code, write the letter of that exercise above it. Keep working and you will decode "define" print.

(D) $-12 + (-30) + 8$

(U) $(-4)(5)(-2)(-9)$

(E) $28 - 45$

(G) $-24 - (-50) - 38$

(F) $-36 - 18$

(M) $\frac{-68 - 112}{-10}$

(I) $-7(-10 + 3)$

(Z) $(-1)(9) + (6)(-6)$

(R) $\frac{-3(20)}{12}$

(K) $-4325 + 6128 - 475$

(A) $(-4)(7) + (-2)(-3)$

(C) $(36 - 24)(24 - 36)$

(P) $\frac{14 - 40}{-2}$

(O) $\frac{-6 - 3 + 15 - 2}{4 - 14 - 1 + 9}$

(L) $(-6)(7)(-8)$

(N) $3(13) + (-7)(2)$

(T) $\frac{-48}{3} + \frac{-65}{5}$

(W) $\frac{-38}{-2} + \frac{-96}{12}$

How Does a Hawaiian Baritone Laugh?

Simplify each expression below. Find your answer at the bottom of the page and cross out the letter above it. When you finish, the answer to the title question will remain.

- | | | | | | |
|---|---------------|----|-------------------------|----|------------------------------|
| 1 | $-3x + 9x$ | 8 | $-2y + 7y + 4$ | 15 | $9 - 3x - (-8y) + 9x - y$ |
| 2 | $2y - 10y$ | 9 | $5x + 7 + x - 9x$ | 16 | $x - 4y - 12 - 5y + 8y$ |
| 3 | $-6x + x$ | 10 | $-8y - 2y - 4 + 4y$ | 17 | $3x + 7 - 7y + 2x - 3y - 1$ |
| 4 | $12y - y$ | 11 | $6x - (-3x) + x - 6$ | 18 | $-9x - y + 1 + 5y + 5x - 10$ |

What Is It Like to Live Under a Carpet?

Evaluate each formula below for the given values of the variables. Find each answer at the bottom of the page and cross out the letters above it. When you finish, the answer to the title question will remain.

- ① $d = rt$ where d is the distance traveled by an object moving at speed r in time t . Find d if
 $r = 52$ m/sec, $t = 8$ sec. _____ m
-
- ② $V = \ell wh$ where V is the volume of a rectangular solid with length ℓ , width w , and height h . Find V if
 $\ell = 12$ cm, $w = 5$ cm, $h = 3.5$ cm. _____ cm³
-
- ③ $P = 2\ell + 2w$ where P is the perimeter of a rectangle with length ℓ and width w . Find P if
 $\ell = 16$ km, $w = 7.5$ km. _____ km
-
- ④ $d = \frac{1}{2}n(n - 3)$ where d is the number of diagonals of a polygon with n sides. Find d if
 $n = 20$. _____ diagonals
-
- ⑤ $V = P(1 + rt)$ where V is the value of an investment of P dollars, invested at simple interest rate r for time t . Find V if
 $P = \$500$, $r = .08$ per year, $t = 3$ years. \$ _____
-
- ⑥ $s = 4.9t^2$ where s is the distance in meters a free-falling object travels in t seconds. Find s if
 $t = 4$ sec. _____ m
-
- ⑦ $P = I^2R$ where P is the power in an electrical circuit with current I and resistance R . Find P if
 $I = 12$ amperes, $R = 2$ ohms _____ watts
-
- ⑧ $A = 2w^2 + 4hw$ where A is the surface area of a square prism with a square base of side w and with height h . Find A if
 $w = 7$ cm, $h = 10$ cm _____ cm²

What Do You Call It When Police Interrogate a Cow's Husband?

Solve each problem and find your solution in the rectangle below. When you finish, there will be six boxes not crossed out. Print the letters from these boxes in the spaces at the bottom of the page.

- ① Eight more than a number is 20.
Find the number.
- ② Twelve less than a number is -3 .
Find the number.
- ③ Three more than a number is -5 .
Find the number.
- ④ Nine less than a number is -24 .
Find the number.
- ⑤ If 10 is subtracted from a number, the result is 23.
Find the number.
- ⑥ If 32 is added to a number, the result is -4 .
Find the number.
- ⑦ If a number is increased by 6, the result is 50.
Find the number.
- ⑧ If a number is decreased by 16, the result is -2 .
Find the number.
- ⑨ The length of a tennis court is 78 feet. This is 51 feet more than the width. What is the width?
- ⑩ Andy hit 14 homeruns this season. If this is 9 fewer than he hit last season, how many homeruns did he hit last season?
- ⑪ Jennifer added \$120 to her savings account during July. If this brought her balance to \$700, how much had she saved previously?
- ⑫ The temperature in Frostburg is -7°C . This is 18°C less than the temperature in Coldspot. Find the temperature in Coldspot.
- ⑬ After 9 new members joined the ski club, there were 38 members. How many members had been in the club previously?
- ⑭ The altitude of a submarine is -60 meters. If this is 25 meters less than its previous altitude, what was its previous altitude?

Why Does Duffer McVolt Want Lights Strung Around the Golf Course?

Solve each equation below and find your solution at the bottom of the page. Write the letters next to the equation in the two boxes above the solution.

EN $3x = 17$

NG $6y = -15$

AL $\frac{1}{7}m = 9$

BS $45 = -\frac{1}{4}d$

IN $\frac{n}{3} = 16$

GH $-10u = -4$

LY $\frac{x}{2} = -\frac{13}{2}$

HE $\frac{7}{5} = -\frac{d}{5}$

YS $3e = \frac{9}{4}$

RE $5w = -\frac{1}{2}$

TC $10y + 8y = 15$

JO $-720 = x - 9x$

SW $\frac{5}{6} = \frac{1}{12}v$

NI $-4p = \frac{20}{3}$

GI $6x - 7x = 18$

LU $\frac{11}{30} = -\frac{a}{9}$

-7	$2\frac{2}{3}$	$-\frac{1}{10}$	63	-13	$-\frac{3}{8}$	$5\frac{2}{3}$	90	$\frac{3}{4}$	75	10	48	-18	$-2\frac{1}{2}$	6	$-\frac{2}{3}$	$\frac{2}{5}$	$\frac{5}{6}$	$-3\frac{3}{10}$	-180

OBJECTIVE 4-e: To solve equations of the form $ax = b$, where a is an integer or unit fraction (solutions are not necessarily integers).

SIGN UP

1. Sign on a waterbed:

$8\frac{3}{4}$	-72	$\frac{2}{15}$	$-\frac{2}{3}$	$-10\frac{1}{2}$

-7	$-\frac{2}{7}$	$-\frac{6}{7}$	$-\frac{2}{3}$	$4\frac{4}{9}$

		$-\frac{2}{15}$	-72	$4\frac{4}{9}$

$-1\frac{1}{10}$	$-10\frac{1}{2}$	18	$-8\frac{1}{3}$	$-\frac{2}{7}$

2. Sign on a chicken incubator:

$-8\frac{1}{3}$	$-7\frac{1}{2}$	$-\frac{2}{7}$	$-1\frac{1}{10}$	$-\frac{2}{7}$

$4\frac{1}{4}$	$\frac{2}{3}$	$-\frac{2}{3}$	

$-\frac{6\frac{2}{3}}$	$-7\frac{1}{2}$	$-\frac{2}{7}$	

$-5\frac{1}{3}$	-45	$2\frac{1}{3}$	$\frac{2}{15}$

TO DECODE THESE TWO SIGNS:

Solve each equation below and find your solution in the code. Each time the solution appears, write the letter of that exercise above it. Enjoy the "signery"!

(R) $-8x = 56$

(G) $-40 = m - 10m$

(L) $-4x = 42$

(O) $\frac{1}{5}n = -9$

(A) $\frac{2}{3}y = 12$

(Z) $-35 = -15p$

(I) $24 = -\frac{1}{3}t$

(T) $\frac{3}{5}x = -4$

(Y) $\frac{3}{4}y = -\frac{1}{2}$

(B) $4r = 17$

(D) $-\frac{3}{2}d = 8$

(N) $\frac{5}{3}u = \frac{2}{9}$

(S) $-7u = 20$

(V) $5 = \frac{4}{7}w$

(E) $-\frac{7}{8}m = \frac{1}{4}$

(C) $8t - 5t = -25$

(H) $-3 = \frac{2}{5}v$

(P) $4x - 9x = \frac{11}{2}$

What Were the Headlines After a 3 Foot 10 Inch Fortuneteller Escaped From Jail?

Solve each equation and find your solution below. Cross out the box containing that solution. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ① $3(2x + 5) = 39$
 - ② $2(6k - 1) = -38$
 - ③ $8(7 - y) = -24$
 - ④ $-4(8 + 5n) = 8$
 - ⑤ $6(3x - 5) - 7x = 25$
 - ⑥ $-2(5 + 6m) + 16 = -90$
 - ⑦ $15(t + 2) + 9t = 6$
 - ⑧ $7w - 3(4w + 8) = 11$
-
- ⑨ $22 - 5(6v - 1) = -63$
 - ⑩ $18x - (8x - 7) = 67$
 - ⑪ $8(-2x - 4) + 12 = -52$
 - ⑫ $2(9n - 1) + 7(n + 6) = -60$
 - ⑬ $-3(3x + 15) - (10 + x) = 35$
 - ⑭ $11(4 - 6y) + 5(13y + 1) = 9$

CRYPTIC QUIZ

1. Why does Beethoven now spend all his time erasing music?

$\overline{16}$ $\overline{6}$ $\overline{-4}$ $\overline{10}$ $\overline{-3}$ $\overline{6}$ $\overline{-9}$ $\overline{7}$ $\overline{20}$ $\overline{-5}$ $\overline{7}$ $\overline{10}$ $\overline{-4}$ $\overline{3}$ $\overline{21}$

2. What is it called when a sea bird lands on a channel marker?

$\overline{-36}$ $\overline{9}$ $\overline{7}$ $\overline{-8}$ $\overline{20}$ $\overline{6}$ $\overline{6}$ $\overline{-2}$ $\overline{10}$ $\overline{21}$ $\overline{9}$ $\overline{11}$ $\overline{11}$

3. How does a tree feel after a hard day at work?

$\overline{-36}$ $\overline{9}$ $\overline{10}$ $\overline{16}$ $\overline{6}$ $\overline{-3}$

TO DECODE THE ANSWERS TO THESE QUESTIONS:

Solve each equation below and find your answer in the code. Each time the solution appears, write the letter of that exercise above it.

Ⓐ $8u = 3u + 35$

Ⓝ $7y = 33 - 4y$

Ⓔ $2x + 48 = 10x$

Ⓣ $5t - 26 = 18t$

Ⓡ $k = 8k + 28$

Ⓖ $-30n = -27n - 63$

ⓗ $4x + 4 = 2x + 36$

Ⓓ $9y - 1 = y - 25$

Ⓟ $14p - 8 = 22 + 20p$

Ⓛ $z + 81 = 9z - 7$

Ⓨ $39 - 12w = 7 - 16w$

Ⓒ $-15v - 40 = 23 - 8v$

Ⓜ $63 - x = 2x + 3$

Ⓤ $3n + 46 = 1 + 8n$

Ⓑ $12r - 18 = 13r + 18$

Ⓢ $-x - 1 = x - 21$

Why Do Girls Like Guys Who Wear Shirts With Eight Buttons?

Solve each equation below and find your solution at the bottom of the page. Write the letter of that equation above the solution.

- (E) $4(5n - 7) = 10n + 2$
- (N) $9(x + 3) = 4x - 3$
- (A) $2(12 - 8x) = x - 11x$
- (H) $3t + 8(2t - 6) = 2 + 14t$
- (E) $2v + 18 = 16 - 4(v + 7)$
- (I) $4x - (9 - 3x) = 8x - 1$
- (T) $12(3 + y) = 5(2y + 8)$
- (A) $-7(1 - 4m) = 13(2m - 3)$
- (Y) $9(11 - k) = 3(3k - 9)$
- (S) $4x + 5(7x - 3) = 9(x - 5)$
- (T) $2(6d + 3) = 18 - 3(16 - 3d)$
- (F) $8(4u - 1) - 12u = 11(2u - 6)$
- (C) $-5 - (15y - 1) = 2(7y - 16) - y$

What Do They Call Bowling in Hawaii?

Solve each problem below. Then find your solution in the answer column and notice the letter next to it. Write this letter in each box that contains the number of that problem. Aloha-ha-ha!

- ① The second of two numbers is 4 times the first. Their sum is 50. Find the numbers.
- ② The larger of two numbers is 12 more than the smaller. Their sum is 84. Find the numbers.
- ③ The sum of two numbers is 45. The first is 9 less than the second. Find the numbers.
- ④ The second of two numbers is 5 more than twice the first. Their sum is 80. Find the numbers.
- ⑤ The larger of two numbers is 1 less than 3 times the smaller. Their sum is 63. Find the numbers.
- ⑥ Find two numbers whose sum is 92, if the first is 4 more than 7 times the second.
- ⑦ The sum of two numbers is 172. The first is 8 less than 5 times the second. Find the *first* number.
- ⑧ Together, a necklace and a bracelet cost \$192. Find the price of each if the necklace costs 3 times as much as the bracelet.
- ⑨ Grandpa's age is 6 years less than 6 times Junior's age. The sum of their ages is 78. Find each of their ages.
- ⑩ The first of two films lasted 3 minutes less than twice as long as the second. Together the two films lasted 132 minutes. How long was the *first* film?

What Happened to the Guy Who Lost His Left Side?

Solve each problem and find your solution below. Cross out the box containing that solution. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ① The second of two numbers is 6 times the first. Their sum is 77. Find the numbers.
- ② The second of two numbers is 3 less than twice the first. Their sum is 36. Find the numbers.
- ③ The sum of two numbers is 84. The first is 9 more than 4 times the second. Find the first number.
- ④ The larger of two numbers is 1 less than 8 times the smaller. Their sum is 179. Find the numbers.
- ⑤ An 84-meter length of cable is cut so that one piece is 18 meters longer than the other. Find the length of each piece.
- ⑥ A bottle filled with water weighs 9.6 kilograms. If the water by itself weighs 5 times as much as the bottle, what is the weight of the bottle?
- ⑦ Andy's weight is 5 kilograms less than twice his brother's. Together they weigh 100 kilograms. What are their weights?
- ⑧ The sum of three numbers is 61. The second number is 5 times the first, while the third is 2 less than the first. Find the numbers.
- ⑨ The sum of three numbers is 84. The second number is twice the first, and the third is 4 more than the second. Find the numbers.
- ⑩ Together a chair, a table, and a lamp cost \$562. The chair costs 4 times as much as the lamp, and the table costs \$23 less than the chair. Find the cost of the table.
- ⑪ The sum of the angle measures of any triangle is 180° . Find the angle measures of a triangle if the second angle measures 10° less than twice the first, and the third angle measures 25° more than the second.

What's the Quickest Way for an Ant to Go From the Ground to the Tree Trunk?

Solve each problem below. Find your solution in the answer column and notice the letter next to it. Write this letter in each box that contains the number of that problem.

- ① The length of a rectangle is 3 times the width. The perimeter is 96 cm. Find the width and length.
- ② The length of a rectangle is 5 m greater than the width. The perimeter is 150 m. Find the width and length.
- ③ The width of a rectangle is 12 cm less than the length. The perimeter is 156 cm. Find the width and length.
- ④ The length of a rectangle is 2 cm less than 7 times the width. The perimeter is 60 cm. Find the width and length.
- ⑤ The perimeter of a triangle is 76 cm. Side a of the triangle is twice as long as side b . Side c is 1 cm longer than side a . Find the length of each side.
- ⑥ The first side of a triangle is 8 m shorter than the second side. The third side is 4 times as long as the first side. The perimeter is 26 m. Find the length of each side.
- ⑦ A triangular sail has a perimeter of 25 m. Side a is 2 m shorter than twice side b , and side c is 3 m longer than side b . Find the length of each side.
- ⑧ The triangle shown at the right is *isosceles*. That is, it has two sides of equal length. The third side is 30 m shorter than twice the length of each congruent side. The perimeter is 570 m. Find the length of each side.

Why Did the Sore Tooth Take Up So Much Space?

Solve each problem below. Find your solution in the answer column and notice the two letters next to it. Write these letters in the two boxes at the bottom of the page that contain the number of that problem.

- ① The length of a rectangle is 3 times the width. If the length is decreased by 4 m and the width is increased by 1 m, the perimeter will be 66 m. Find the dimensions of the original rectangle.
- ② The length of a rectangle is 6 cm longer than the width. If the length is increased by 9 cm and the width by 5 cm, the perimeter will be 160 cm. Find the dimensions of the original rectangle.
- ③ The length of a rectangle is 7 m less than twice the width. If the length is decreased by 1 m and the width by 4 m, the perimeter will be 66 m. Find the dimensions of the original rectangle.
- ④ The perimeter of a triangle is 69 cm. Side **a** is 5 cm shorter than side **b**. Side **c** is twice as long as side **a**. Find the length of each side.
- ⑤ The first side of a triangle is 7 cm shorter than twice the second side. The third side is 4 cm longer than the first side. The perimeter is 80 cm. Find the length of each side.
- ⑥ The length of a rectangular field is 18 m longer than the width. The field is enclosed with fencing and divided into two parts with a fence parallel to the shorter sides. If 216 m of fencing are required, what are the dimensions of the outside rectangle? (See diagram to the right.)

SOLVING PROBLEMS, ALGEBRAICALLY

1. "I love to go camping," Tom said

$$\frac{\quad}{-9} \frac{\quad}{12} \frac{\quad}{10} \frac{\quad}{-5} \frac{\quad}{12} \frac{\quad}{10} \frac{\quad}{50} \frac{\quad}{2}$$

2. "I think I'm sick," Tom said

$$\frac{\quad}{90} \frac{\quad}{50} \frac{\quad}{-1} \frac{\quad}{-5} \frac{\quad}{12} \frac{\quad}{10} \frac{\quad}{50} \frac{\quad}{2}$$

3. "Light the fuse," Tom said

$$\frac{\quad}{-7} \frac{\quad}{-9} \frac{\quad}{8} \frac{\quad}{20} \frac{\quad}{-5} \frac{\quad}{3} \frac{\quad}{50} \frac{\quad}{2}$$

THESE ARE CALLED "TOM SWIFTY" JOKES. TO DECODE THE MISSING WORDS:

Solve each problem below and find your solution in the code. Each time the solution appears, write the letter of that problem above it. You will decode the missing words with your equations, invariably!

(D) Seven times a number is the same as 12 more than 3 times the number. Find the number.

(E) Six more than 5 times a number is the same as 9 less than twice the number. Find the number.

(U) Three less than 11 times a number is the same as the number decreased by 13. Find the number.

(C) One more than 3 times a number is the same as 5 times the number, decreased by 15. Find the number.

(Y) Twelve less than a number is the same as 6, decreased by 8 times the number. Find the number.

(W) Ten increased by 6 times a number is the same as 4 less than 4 times the number. Find the number.

(I) Eight times a number plus 3 times the number is the same as 9 more than 12 times the number. Find the number.

(K) The sum of two numbers is 35. Three times the larger number is the same as 4 times the smaller number. Find the larger number. (HINT: Let $x =$ larger number; $35 - x =$ smaller number.)

(T) The sum of two numbers is 24. Seven times the smaller number is the same as 5 times the larger number. Find the smaller number.

(F) An orange has 20 fewer calories than a banana. If 7 bananas have the same number of calories as 9 oranges, how many calories are in a banana?

(L) Keith weighs 20 kg more than Beth, while Henry weighs 30 kg less than twice as much as Beth. If Keith and Henry weigh the same, how much does Beth weigh (in kg)?

(N) Cycle Paths, Inc. makes bicycles, tricycles, and unicycles. Last week they made 88 more bicycles than unicycles, and 5 times as many tricycles as unicycles. If they made 40 more bicycles than tricycles, how many unicycles did they make?

What Did Mrs. Sternwhistle Say When Her Toddler Knocked Over the Coffee Pot?

Solve each problem below. Find your solution in the answer column and notice the two letters next to it. Write these letters in the two boxes at the bottom of the page that contain the number of that problem.

- ① The second of three numbers is 8 more than the first, and the third number is 3 less than 3 times the first. If the third number is 15 more than the second, find the three numbers.

1st _____, 2nd _____, 3rd _____

- ② In the championship game, Julius scored 5 points less than Kareem, and Wilt scored 1 point more than twice as many as Kareem. If Wilt scored 20 points more than Julius, how many points were scored by each player?

Kareem _____, Julius _____, Wilt _____

- ③ Model Cars, Inc. makes red cars, white cars, and blue cars. The profit on a blue car is \$10 more than the profit on a white car, and the profit on a red car is \$7 less than the profit on a white car. If the profit on two red cars is \$2 less than the profit on one blue car, what is the profit on a blue car?

\$ _____

- ④ Last year Grok's mother weighed 3 times as much as Grok. Since then Grok has gained 9 kg and his mother has lost 4 kg. Now his mother weighs only twice as much as Grok. Find their weights now.

Grok _____ kg, mother _____ kg

- ⑤ A hamburger costs 30¢ more than a hot dog and 20¢ less than a cheeseburger. If 3 hamburgers cost 75¢ less than 2 hot dogs and 2 cheeseburgers, how much does a hamburger cost?

_____ ¢

- ⑥ Smedly has just drawn two rectangles. The length of the first rectangle is 4 cm more than the length of the second. The width of the first is 9 cm; the width of the second is 6 cm. If the area of the first rectangle is 96 cm² greater than the area of the second, find the length of each.

1st _____ cm, 2nd _____ cm

What Did They Call the Bug That the Astronauts Brought Back From the Moon?

Solve each problem below. Find your solution at the bottom of the page and cross out the letter above it. When you finish, the answer to the title question will remain.

- ① Andy is twice as old as Kate. In 6 years, their ages will total 60. How old is each now?
Kate _____, Andy _____
- ② Mrs. Wang is 23 years older than her daughter. In 5 years, their ages will total 63. How old are they now?
daughter _____, Mrs. Wang _____
- ③ Matthew is 3 times as old as Jenny. In 7 years, he will be twice as old as she will be then. How old is each now?
Jenny _____, Matthew _____
- ④ Juan is 8 years older than his sister. In 3 years, he will be twice as old as she will be then. How old are they now?
sister _____, Juan _____

- ⑤ Melissa is 24 years younger than Joyce. In 2 years, Joyce will be 3 times as old as Melissa will be then. How old are they now?
Joyce _____, Melissa _____
- ⑥ Tom is 4 years older than Jerry. Nine years ago, Tom was 5 times as old as Jerry was then. How old is each now?
Jerry _____, Tom _____
- ⑦ Kathy is 6 years younger than Bill. Twelve years ago, Bill was twice as old as Kathy was then. How old are they now?
Bill _____, Kathy _____
- ⑧ Dr. Garcia is twice as old as his son. Twenty years ago, he was 4 times as old as his son was then. How old are they now?
son _____, Dr. Garcia _____

How Do Owners of Large Estates Spend Their Time?

Solve each problem and find your solution below. Cross out the box containing that solution. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- 1 Barbara is 142 cm tall. This is 2 cm less than 3 times her height at birth. Find her height at birth.
- 2 A bicycle is on sale at \$12 more than half of the regular price. If the sale price is \$75, find the regular price.
- 3 A set of children's blocks contains three shapes: longs, flats, and cubes. There are 3 times as many longs as cubes, and 30 fewer flats than longs. If there are 600 blocks in all, how many longs are there?
- 4 The length of a rectangular field is 7 m less than 4 times the width. The perimeter is 136 m. Find the width and length.
- 5 Find three consecutive odd integers such that the sum of the smallest and 7 times the largest is 68.
- 6 Mark is 11 years older than his sister. In 8 years he will be twice as old as she will be then. How old are they now?

- 7 A Sugar Dud has 30 less than twice as many calories as a Krunchy Krum. If 5 Sugar Duds have the same number of calories as 8 Krunchy Krums, how many calories are in each?
- 8 The perimeter of a triangle is 71 cm. The first side is 3 cm shorter than the second side, and the third side is twice as long as the first side. Find the length of the longest side.
- 9 In a week Mike ran 8 km farther than Bill, while Pete ran 1 km less than 3 times as far as Bill. If Pete ran 15 km farther than Mike, how many kilometers did Bill run?
- 10 The larger of two consecutive integers is 7 greater than twice the smaller. Find the integers.
- 11 A square and a rectangle have the same perimeter. The length of the rectangle is 4 cm less than twice the side of the square, and the width of the rectangle is 6 cm less than the side of the square. Find the perimeter of each figure.

Why Do People Say That Bertha Lummox Runs Like Lightning?

Do each exercise below. Find your answer in the corresponding answer column and notice the number next to it. Write the letter of the exercise in the box containing this number.

(S) $-19 + 15 + (-40)$

(N) $\frac{16 - 48}{-2}$

(I) $-6(-3 + 14)$

(S) $10(-64 - 36)$

(L) $(-2)(25)(-5)$

(E) $\frac{-27}{9} + \frac{-75}{-5}$

(A) $(6)(-2) + (-10)(-3)$

(S) $\frac{-6(20)}{15}$

(T) $-12 \cdot 2 \cdot 30$

(E) $(-70)^2$

(I) $1 - 9 - 7 - 5$

(S) $\frac{33 - 22}{22 - 33}$

(A) $-25 - (-75) - 100$

(S) $(-3)(4)(-5)(6)$

(H) $\frac{-36}{2} + \frac{-72}{4}$

(R) $(-5)^3$

(Y) $(-1)(16) + (-2)(16)$
 $\frac{1 - 8 + 3 - 5}{-6 - 2 + 9 - 4}$

(G) $\frac{1 - 8 + 3 - 5}{-6 - 2 + 9 - 4}$

(I) $(6 - 18)(18 - 6)$

(E) $-3750 + 5999 - 1250$

(W) $\frac{(2)(-2)(2)(-2)(2)}{-16}$

(K) $-14 - (-14) - 14$

(T) $5(12) + 3(-9)$

(R) $\frac{-3(-7 + 2)}{21 - 6}$

Did You Hear About...

A	B	C	D	E	F	G	H
I	J	K	L	M	N	O	P
							?

Solve each equation below. Find the solution in one of the answer columns and notice the word next to it. Write this word in the box containing the letter of that exercise. You will hear about a creature who eats what "bugs" him.

$-1\frac{7}{8}$	THAT	$-4\frac{1}{2}$	JUST
$1\frac{1}{2}$	WHO	$3\frac{1}{5}$	MOVED
$1\frac{5}{6}$	A	$-\frac{1}{8}$	FRENCH
$\frac{2}{3}$	THE	$-1\frac{3}{5}$	ORDER
6	SO	$-3\frac{1}{3}$	WITH
$5\frac{1}{3}$	KETCHUP	$2\frac{2}{9}$	PARIS
-4	HAMBURGER	$2\frac{3}{4}$	COULD
$-\frac{4}{5}$	FROG	$4\frac{1}{9}$	ROLL
$\frac{1}{7}$	HE	0	FLIES
$-1\frac{1}{3}$	TO	$7\frac{1}{2}$	HAVE

- (A) $3y + 5 = 7$
- (B) $9 + 10d = 1$
- (C) $8a - 15 = -3$
- (D) $24 - 5v = 8$
- (E) $-7 = 6x + 1$
- (F) $12 = 32 - 9n$
- (G) $4t - 3 = -21$
- (H) $30 - x = 24$
- (I) $20m + m = 3$
- (J) $7w + 4 - 3w = 15$
- (K) $-7 - 4u - u = 1$
- (L) $3y + 22 - 15y = 0$
- (M) $x + 8x + 2x = 6 - 50$
- (N) $48 = -11t + 18 + 2t$
- (O) $40p - 5 = -5 - 5$
- (P) $100x + 99 - x = 99$

What Is the Advantage of Buying a Magnetic Bulletin Board?

Solve each equation and find your solution below. Cross out the box containing that solution. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ① $3(5x - 4) = 8x + 2$
- ② $9(n + 3) = 7n - 3$
- ③ $2(10 - 6x) = x - 8x$
- ④ $5a + 4(3a - 8) = 4 + 13a$
- ⑤ $2y + 18 = 12 - 6(y + 7)$
- ⑥ $x - (5 - 3x) = 7x + 4$
- ⑦ $8(m - 5) = 2(3m - 8)$
- ⑧ $-4(3 - 6d) = 9(2d - 2)$
- ⑨ $7(10 - 3w) = 5(15 - 4w)$
- ⑩ $6t + 3(5t - 4) = 12(2t - 5)$
- ⑪ $2(9x - 1) = 99 - 7(3 - 4x)$
- ⑫ $6(5k - 8) - 20 = 11(2k - 3) + 3k$
- ⑬ $-x - (13 + 4x) = -3(5 - 9x) + 2$

What Happened to the Boy Who Went to the Dentist With Only One Dollar?

Solve each problem below. Find your solution in the answer column and notice the letter next to it. Look for this letter in the string of letters near the bottom of the page and CROSS IT OUT each time it appears. When you finish, write the remaining letters in the rectangle at the bottom of the page.

1	The second of two numbers is 7 times the first. Their sum is 72. Find the numbers.
2	The larger of two numbers is 5 less than twice the smaller. Their sum is 43. Find the numbers.
3	The sum of two numbers is 75. The first is 9 more than 5 times the second. Find the first number.
4	Jack's bowling score is 20 less than 3 times Jill's score. The sum of their scores is 220. Find the score of each.
5	Jennifer cut a board 2 m long into two pieces. One piece is 24 cm shorter than the other. Find the length of each piece.
6	With optional equipment, an automobile cost \$9120. If the cost of the basic car was \$120 more than 4 times the price of the optional equipment, what was the cost of the basic car?
7	The sum of three numbers is 207. The second number is 8 times the first, while the third is 3 less than the first. Find the numbers.
8	The sum of three numbers is 161. The second number is 6 times the first, and the third is 5 more than the second. Find the numbers.
9	A group of backpackers hiked 38 km over three days. The first day, they hiked 1 km less than 3 times as far as the second day. The third day, they hiked 2 km less than the first day. How far did they hike the first day?
10	One week, Huey worked 7 hours less than Dewey, and Louie worked twice as long as Huey. Together they worked 87 hours. Find the number of hours worked by each.

- (C) 14 km
- (T) 23, 164, 20

Answer:

TEST OF GENIUS

- ① Terry, Barry, Larry, Jerry, and Perry are lined up in these positions midway through a track meet:

Terry is 20 meters behind Barry.
 Barry is 50 meters ahead of Larry.
 Larry is 10 meters behind Perry.
 Jerry is 30 meters ahead of Terry.
 Perry is 50 meters behind Jerry.

At this point in the race, who is winning?
 Who is second? Third?

- ② What is the weight of a fish if it weighs 10 pounds, plus half its weight?

$$\text{weight} = \frac{1}{2} \text{ of weight} + 10 \text{ pounds}$$

- ③ A square cake measures 6 units by 6 units by 4 units. The cake falls into a vat of frosting and comes out frosted on all six faces. The cake is then cut up into cubes, each measuring 1 unit on an edge. How many of these cubes will have exactly one face frosted?

- ④ Homer is giving some cookies to each of his three brothers. To the oldest, he gives half of the cookies and half a cookie. He then gives half of what is left and half a cookie to his second brother. Finally, he gives half of what is now left and half a cookie to his youngest brother. At no time is a cookie broken or cut. How many cookies did Homer have to begin with? (HINT: Work backwards.)

- ⑤ The toothpicks in the figure at the right represent a glass with a cherry inside. By moving just two toothpicks, reconstruct the glass so that the cherry, which may not be moved, winds up outside. The glass may be reconstructed on its side or even upside down, but must have the same shape.

- ⑥ When the time is 2:18, how many degrees are there in the acute angle between the minute hand and the hour hand on a clock?

- ⑦ Annabel Zonk has discovered something interesting about her first name. If the letters are arranged as they are below, it is possible to replace each different letter with a different digit and have the multiplication work out correctly. What digit should replace each letter?

$$\begin{array}{r} \text{ANN} \\ \times \text{A} \\ \hline \text{BEL} \end{array}$$

- ⑧ An algebra teacher drove past a farmyard that was full of chickens and pigs. The teacher happened to notice that there were a total of 70 heads and 200 legs. How many chickens and how many pigs were there?

What Did the Girl Mushroom Say About the Boy Mushroom After Their First Date ?

- ① $5(2n^2 + n)$
- ② $3n(8n^2 - 2n)$
- ③ $n^2(4n - 3)$
- ④ $-2n(4 + 5n^3)$
- ⑤ $-6n^2(4n^2 - 9)$

Answers:

- ① $10n^2 + 5n$
- ② $24n^3 - 6n^2$
- ③ $4n^3 - 3n^2$
- ④ $-8n - 6n^3$
- ⑤ $-8n - 10n^4$

For each exercise below, multiply the polynomial by the monomial. Find your answer in the set of answers under the exercise and notice the letter next to it. Write this letter in the box that contains the number of that exercise.

- ⑥ $4a(a^2 - 2a + 3)$
- ⑦ $-2a^2(9 - a - 4a^2)$
- ⑧ $a^2b(a^2 - b^2)$
- ⑨ $-3ab^2(a^3b^2 - 2a^2b)$
- ⑩ $2ab(a^2 + 4ab - 3b^2)$

Answers:

- ① $4a^3 - 8a^2 + 10a$
- ② $-18a^2 + 2a^3 + 8a^4$
- ③ $2a^3b + 8a^2b^2 - 6ab^3$
- ④ $2a^3b + 8ab^2 - 4ab$
- ⑤ $a^4b - a^2b^3$
- ⑥ $4a^3 - 8a^2 + 12a$
- ⑦ $-18a^2 + 2a^3 + 6a^5$
- ⑧ $-3a^4b^4 + 6a^3b^3$

- ⑪ $x^2y(2x^2 - 4xy + y^2)$
- ⑫ $-2xy^2(2x^4 - 5x^2y^2 - 3y^4)$
- ⑬ $4x^3y(-x^2y + 2xy - 5xy^2)$
- ⑭ $-x^2y^3(7xy^3 - x^2y^2 + 3x^3y)$
- ⑮ $3x^2y^2(2x^4y^2 - 3x^2y - 1)$

Answers:

- ① $-4x^5y^2 + 10x^3y^4 + 6xy^6$
- ② $2x^4y - 4x^2y^3 + x^2y^4$
- ③ $-4x^5y^2 + 8x^4y^2 - 20x^4y^3$
- ④ $-4x^5y^2 + 10x^2y^4 - 20x^2y^3$
- ⑤ $2x^4y - 4x^3y^2 + x^2y^3$
- ⑥ $6x^6y^4 - 9x^4y^3 - 3x^2y^2$
- ⑦ $-7x^3y^6 + x^5y^4 - 3x^3y^4$
- ⑧ $-7x^3y^6 + x^4y^5 - 3x^5y^4$

Where Can You See the World's Biggest Rock Group?

Evaluate each formula below for the given values of the variables. Find each answer at the bottom of the page and cross out the letters above it. When you finish, the answer to the title question will remain.

① $V = hw^2$

where V is the volume of a square prism with a square base of side w and with height h . Find V if

$h = 8$ cm, $w = 6$ cm. _____ cm^3

② $A = \frac{1}{2}h(a + b)$

where A is the area of a trapezoid with height h , and bases of lengths a and b . Find A if

$h = 12$ cm, $a = 24$ cm, $b = 18$ cm. _____ cm^2

③ $V = C\left(1 - \frac{n}{N}\right)$

where V is the value of an asset, depreciated over N years, at the end of n years; C is the original cost of the asset. Find V if

$C = \$800$, $n = 5$ years, $N = 20$ years. \$ _____

④ $h = rt - 4.9t^2$

where h is the height in meters that an object will reach in t seconds when it is projected upward with an initial speed of r meters per second. Find h if

$r = 75$ m/sec, $t = 10$ sec. _____ m

⑤ $w = 0.8e^3$

where w is the approximate weight in grams of an ice cube with edges of length e centimeters. Find w if

$e = 5$ cm. _____ g

⑥ $R = \frac{rst}{rs + st + rt}$

where R is the total resistance of three resistances r , s , and t , in parallel. Find R if

$r = 4$ ohms, $s = 10$ ohms, $t = 15$ ohms. _____ ohms

⑦ $V = \frac{1}{3}\pi r^2 h$

where V is the volume of a right circular cone with a base of radius r and with height h . Find V if

$r = 6$ cm, $h = 10$ cm.
Use 3.14 as the value of π . _____ cm^3

* How Did the Doe Win the Big Animal Race? *

Solve each problem below. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the squares at the bottom of the page.

- ① Mr. Merrill has 3 times as many nickels as dimes. The coins have a total value of \$1.50. How many of each coin does he have? _____ nickels, _____ dimes
- ② Ms. Lynch has 21 coins in nickels and dimes. Their total value is \$1.65. How many of each coin does she have? _____ nickels, _____ dimes
- ③ A vending machine that takes only dimes and quarters contains 30 coins, with a total value of \$4.20. How many of each coin are there? _____ dimes, _____ quarters
- ④ The total value of the \$1 bills and \$5 bills in a cash box is \$124. There are 8 more \$5 bills than \$1 bills. How many of each are there? _____ \$1 bills, _____ \$5 bills
- ⑤ A collection of nickels and quarters amounts to \$2.60. There are 16 coins in all. How many of each coin are there? _____ nickels, _____ quarters
- ⑥ Joe Lick bought some 20-cent and 25-cent stamps. He bought 32 stamps in all, and paid \$7.40 for them. How many stamps of each kind did he buy? _____ 20-cent, _____ 25-cent
- ⑦ For a school play, 340 tickets valued at \$810 were sold. Some cost \$2 and some cost \$3. How many tickets of each kind were sold? _____ \$2 tickets, _____ \$3 tickets
- ⑧ Romeo bought a mixture of 20-cent, 35-cent, and 50-cent valentines. The number of 20-cent valentines was 1 more than twice the number of 35-cent valentines, and the number of 50-cent valentines was 2 less than the number of 35-cent ones. If he spent \$4.20 all together, how many valentines of each kind did he buy? _____ 20-cent, _____ 35-cent, _____ 50-cent

What Kind of Car Does a Rich Baker Drive ?

Solve each problem below. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the squares at the bottom of the page.

- 1 Harry and Kerry started from the same point at the same time. They traveled in opposite directions on their bicycles. Harry traveled at the rate of 9 km/h, and Kerry traveled at 11 km/h. After how many hours were they 60 km apart?
- 2 Two trains leave Trackville at the same time. One travels north at 90 km/h. The other travels south at 110 km/h. After how many hours will the trains be 900 km apart?
- 3 Two steamships sailing in opposite directions pass each other. One ship is sailing at 32 knots (nautical miles per hour). The other ship is sailing at 28 knots. After how many hours will the ships be 150 nautical miles apart?
- 4 Two jets are traveling toward each other and are 3400 km apart. One jet is flying at 875 km/h. The other jet is flying at 825 km/h. In how many hours will the jets pass each other?
- 5 A train left Podunk and traveled west at 70 km/h. Two hours later, another train left Podunk and traveled east at 90 km/h. How many hours had the first train traveled when they were 1420 km apart?
- 6 A train left Podunk and traveled north at 75 km/h. Two hours later, another train left Podunk and traveled in the same direction at 100 km/h. How many hours had the first train traveled when the second train overtook it?
- 7 Joe Spout left a campsite on a trip down the river in a canoe, traveling at 6 km/h. Four hours later, Joe's father set out after him in a motorboat. The motorboat traveled at 30 km/h. How long after Joe's father started did he overtake the canoe?
- 8 In Exercise 7, how far had Joe traveled down the river when his father overtook him?

What Do the Fans Sing at University of California Football Games?

Solve each problem below and find your solution at the bottom of the page. Write the letter of that exercise above the solution.

- (A) Two trucks left Buck's Trucks traveling in opposite directions. One truck traveled at a rate of 70 km/h, the other at 80 km/h. After how many hours were the trucks 900 km apart?
- (Y) Two jets are traveling toward each other and are 4000 km apart. The rate of one jet is 100 km/h faster than the rate of the other. If the jets pass each other after 2.5 hours, what is the rate of the faster jet?
- (O) A truck left Huck's Trucks and traveled north at 80 km/h. One hour later, another truck left Huck's Trucks and traveled south at 60 km/h. How many hours had the first truck traveled when they were 150 km apart?
- (S) Ms. Driva Reck drove from her home to a service station at 48 km/h. She returned home by bicycle at 16 km/h. The entire trip took 4 hours. How far was the service station from Ms. Reck's home?
- (N) Steve McSpoke left home on his bicycle at 8:00 A.M., traveling at 18 km/h. At 10:00 A.M., Steve's brother set out after him on a motorcycle, following the same route. The motorcycle traveled at 54 km/h. How long had Steve traveled when his brother overtook him?
- (U) A plane on a search mission flew east from an airport, turned, and flew west back to the airport. The plane cruised at 300 km/h when flying east, and 400 km/h when flying west. The plane was in the air for 7 hours. How far from the airport did the plane travel?
- (C) In Exercise N, how far had Steve traveled when his brother overtook him?
- (C) A motorboat can travel upstream on a river at 18 km/h and downstream at 30 km/h. How far upstream can the boat travel if it leaves at 8:00 A.M. and must return by noon?
- (A) Dr. Pepper left Oakville at 9:00 A.M. and drove to Central City at 60 km/h. H. Salt left Oakville at 11:00 A.M. and traveled the same route to Central City. If both men arrived in Central City at 4:00 P.M., at what rate did H. Salt travel?

DOUBLE CROSS

1. What do you get when you cross a chicken with a centipede?

5 8 11 14 12 2 14 1 10 13 11 6 7 4 13

2. What do you get when you cross a mink with an octopus?

12 7 3 12 11 3 9 12 14 10 13

Factor each polynomial below as the product of its greatest monomial factor and another polynomial. Find your answer and notice the letter next to it. Each time the exercise number appears in the code, write this letter above it. Keep working and you will find out what you get from these "double crosses."

- ① $6x^2 + 9x + 27$
- ② $5x^3 + 30x^2 - 15x$
- ③ $14x^3 - 7x^2 - 35x$
- ④ $25x^3 - 40x^2 + 10x$
- ⑤ $4x^4 + 20x^3 + 12x^2$

Why Didn't Klutz Do Any Homework on Saturday?

Either multiply or factor, as directed, and find your answer in the adjacent answer column. Write the letter of that exercise in the box that contains the number of the answer.

Multiply:

- I $(a + 5)(a - 5)$
 D $(2 + 3a)(2 - 3a)$
 E $(7a - 1)(7a + 1)$
 N $(a^2 - 6)(a^2 + 6)$
 A $(4a + b)(4a - b)$
 O $(2a^2 - 5b)(2a^2 + 5b)$
- 4 $16a^2 - b^2$
 13 $49a^2 - 1$
 6 $a^2 - 25$
 17 $4a^4 - 25b^2$
 15 $4 - 9a^2$
 12 $4a^4 - 36$
 24 $a^4 - 36$

Factor:

- S $x^2 - y^2$
 I $4x^2 - 49y^2$
 W $81x^2 - 100y^2$
 E $36x^2 - 121y^2$
 O $9x^2 - 64y^2$
 N $x^4 - 400$
- 3 $(9x + 10y)(9x - 10y)$
 5 $(x + y)(x - y)$
 7 $(x^2 + 20)(x^2 - 20)$
 11 $(6x + 11y)(6x - 11y)$
 16 $(3x + 7y)(3x - 7y)$
 22 $(2x + 7y)(2x - 7y)$
 23 $(3x + 8y)(3x - 8y)$

Factor:

- E $n^2 - 49$
 A $n^2 - 1$
 N $81 - n^2$
 H $4n^2 - 9$
 I $49n^2 - 16$
 E $144 - 25n^2$
- 1 $(2n + 3)(2n - 3)$
 10 $(12 + 5n)(12 - 5n)$
 8 $(n + 1)(n - 1)$
 5 $(7n + 3)(7n - 3)$
 2 $(n + 7)(n - 7)$
 18 $(9 + n)(9 - n)$
 20 $(7n + 4)(7n - 4)$

Factor:

- T $a^6 - b^4$
 C $25a^8 - 9b^4$
 W $a^2b^2 - 36$
 D $16 - a^4b^6$
 K $a^2b^4 - c^8$
 N $4a^{16} - 225$
- 19 $(4 + a^2b^3)(4 - a^2b^3)$
 14 $(2a^8 + 15)(2a^8 - 15)$
 21 $(a^3 + b^2)(a^3 - b^2)$

What Happens If the Jolly Green Giant Steps on Your House?

For exercises in the first column, express each square as a trinomial. For the remaining exercises, factor each trinomial as the square of a binomial, if possible. (If this is not possible, the correct answer is "not possible.") Find your answer below. Write the letter of the exercise in the box containing the number of its answer.

Express as a trinomial:

- (E) $(u + 3)^2$
- (O) $(u - 8)^2$
- (S) $(2u + 5)^2$
- (L) $(1 - 4u)^2$
- (T) $(u + 2v)^2$
- (U) $(7u - 3v)^2$
- (O) $(uv + 6)^2$

Answers:

- (13) $4u^2 + 20u + 25$
- (3) $4u^2 + 16u + 25$
- (9) $u^2 + 6u + 9$
- (10) $u^2 + 4uv + 4v^2$
- (14) $49u^2 - 31uv + 9v^2$
- (6) $1 - 8u + 16u^2$
- (2) $u^2 - 16u + 64$
- (18) $u^2v^2 + 12uv + 36$
- (5) $u^2 + 7uv + 4v^2$
- (12) $49u^2 - 42uv + 9v^2$

Factor:

- (E) $t^2 + 4t + 4$
- (U) $t^2 - 12t + 36$
- (L) $t^2 - 18t + 81$
- (Y) $25 + 10t + t^2$
- (W) $4t^2 + 20t + 25$
- (S) $9t^2 - 12t + 4$
- (I) $t^2 + 10t + 20$

Answers:

- (5) not possible
- (7) $(t - 9)^2$
- (19) $(t - 12)^2$
- (4) $(2t + 5)^2$
- (15) $(t + 2)^2$
- (21) $(3t - 2)^2$
- (16) $(2t - 9)^2$
- (3) $(t - 6)^2$
- (1) $(5 + t)^2$
- (8) $(3t - 5)^2$

Factor:

- (D) $49a^2 + 14a + 1$
- (O) $16a^2 - 24a + 9$
- (G) $a^2 - 8a + 64$
- (M) $a^2 + 2ab + b^2$
- (H) $a^2 + 10ab + 25b^2$
- (R) $4a^2 - 12ab + 9b^2$
- (M) $100a^2 - 20ab + b^2$

Answers:

- (8) not possible
- (11) $(10a - 3b)^2$
- (16) $(7a + 1)^2$
- (11) $(10a - b)^2$
- (20) $(a + b)^2$
- (17) $(2a - 3b)^2$
- (19) $(4a - 3)^2$
- (20) $(a + 3b)^2$
- (14) $(a + 5b)^2$
- (19) $(4a - 8)^2$

Old Lawyers Never Die, They Just

14 12 5 4 1 10 4 7 9 2 13 4 2 14

Old Skiers Never Die, They Just

8 12 3 12 6 11 10 7 14 14

YOU MAY HAVE HEARD THAT OLD MATH TEACHERS NEVER DIE, THEY JUST REDUCE TO LOWEST TERMS. TO FIND OUT WHAT HAPPENS TO OLD LAWYERS AND SKIERS, FOLLOW THESE DIRECTIONS:

Factor completely each polynomial below. Find your answer in the appropriate answer column and notice the letter next to it. Each time the exercise number appears in the code, write this letter above it.

Answers for 1–7:

- (C) $(3x + 5)(x - 2)$
- (I) $5x(2x - 7)(x + 1)$
- (T) $2(x + 2)(x + 9)$
- (Y) $a(x + 6)(x + 2)$
- (S) $x^2(x + 10)(x - 2)$
- (D) $2x(3x + 7)(3x - 7)$
- (M) $x^2(x + 4)(x - 5)$
- (B) $2(x + 3)(x + 6)$
- (A) $5x(x - 4)(x + 2)$
- (F) $2x(9x - 7)(x + 7)$
- (W) $(3x + 10)(x + 1)$
- (K) $5x(2x - 1)(x + 7)$
- (E) $a(x - 3)(x - 4)$

(1) $2x^2 + 22x + 36$

(2) $5x^3 - 10x^2 - 40x$

(3) $18x^3 - 98x$

(4) $ax^2 - 7ax + 12a$

(5) $x^4 + 8x^3 - 20x^2$

(6) $3x^2 + 13x + 10$

(7) $10x^3 - 25x^2 - 35x$

(8) $12u^2 - 28u - 24$

(9) $u^4 - 3u^2 - 4$

(10) $15u^4 + 2u^3 - u^2$

(11) $2u^2v - 18uv + 28v$

(12) $12u^3 + 36u^2 + 27u$

(13) $40u^2 + 15u - 55$

(14) $u^4 - 10u^2 + 9$

Answers for 8–14:

(H) $u^2(5u - 1)(3u + 1)$

(V) $3u(4u + 3)(u + 3)$

(L) $(u + 1)(u - 1)(u + 3)(u - 3)$

(N) $2v(u - 7)(u - 2)$

(K) $4(3u + 6)(u - 1)$

(B) $(u^2 + 9)(u + 1)(u - 2)$

(G) $4(3u + 2)(u - 3)$

(M) $u^2(15u + 1)(u - 1)$

(P) $5(8u + 11)(u - 1)$

(U) $2v(u + 14)(u + 1)$

(R) $(u^2 + 1)(u + 2)(u - 2)$

(F) $5(4u + 11)(2u + 1)$

(O) $3u(2u + 3)^2$

What Kind of Music Do Barbers and Tailors Play Together?

Solve each problem and find your answer at the bottom of the page. Cross out the letter above each correct answer. When you finish, you will have the answer to the noteworthy question above.

- ① Eight more than the square of a number is the same as 6 times the number. Find the number.
- ② Fifteen less than the square of a number is the same as twice the number. Find the number.
- ③ If a number is added to twice its square, the result is 6. Find the number.
- ④ Seven less than 4 times the square of a number is 18. Find the number.
- ⑤ Find two consecutive integers whose product is 56.

- ⑥ Find two consecutive positive odd integers whose product is 35.
- ⑦ The sum of the squares of two consecutive integers is 41. Find the integers.
- ⑧ Find two consecutive odd integers such that the square of the first, added to 3 times the second, is 24.
- ⑨ Find two consecutive even integers such that the square of the second, decreased by twice the first, is 52.
- ⑩ Find three consecutive positive integers such that the square of the first, increased by the last, is 22.

Solve each problem below. Find your answer in the answer column and notice the word next to it. Write this word in the box containing the letter of that exercise. Keep working and you will hear about something hot.

- (A) The length of a rectangle is 3 cm more than the width. The area is 70 cm^2 . Find the dimensions of the rectangle.
- (B) The length of a rectangle is 4 cm more than the width. The area is 96 cm^2 . Find the dimensions of the rectangle.
- (C) The length of a photograph is 1 cm less than twice the width. The area is 45 cm^2 . Find the dimensions of the photograph.
- (D) If the sides of a square are increased by 3 m, the area becomes 64 m^2 . Find the length of a side of the original square.
- (E) A square field had 5 m added to its length and 2 m added to its width. The field then had an area of 130 m^2 . Find the length of a side of the original field.
- (F) The dimensions of a rectangular garden were 4 m by 5 m. Each dimension was increased by the same amount. The garden then had an area of 56 m^2 . Find the dimensions of the new garden. (Hint: Let x be the amount of increase.)
- (G) The dimensions of a rectangular garden were 3 m by 10 m. When both dimensions were increased by equal amounts, the area of the garden doubled. Find the dimensions of the new garden.

- (H) A 4 m by 6 m rug covers half of the floor area of a room and leaves a uniform strip of bare floor around the edges. What are the dimensions of the room?

TEST OF GENIUS

- ① The land of Euclidia has six remote towns, which we shall call A, B, C, D, E, and F. Unfortunately, not all the towns are connected by telephone lines. Town A is connected to all the other five towns, but Town B is connected to only four. Town C, too, is connected to four; whereas D, E, and F are each connected to only three towns.

There is a line from Town D to Town F. To what towns is Town E connected?

- ② In the following multiplication problem, the letters A, B, C, and D represent four different digits. What digit should replace each letter?

$$\begin{array}{r} ABCD \\ \times 4 \\ \hline DCBA \end{array}$$

- ③ On what day of the week was the following statement made:

When the day before yesterday was referred to as "the day after tomorrow," the day that was then called "yesterday" was as far away from today as today is from next Saturday. (HINT: Use the diagram below.)

- ④ A clock loses ten minutes each hour. If the clock is set correctly at 12 o'clock noon, what is the correct time when the clock reads 3:00 P.M.?

- ⑤ How tall is a tree which is 15 feet shorter than a pole that is three times as tall as the tree?

- ⑥ Rollo, Gorgo, and Zed work in the circus. They are the ringmaster, lion tamer, and clown, though not necessarily in that order.

1. Zed has red hair.
2. Rollo has curly hair.
3. The ringmaster is shorter than Rollo.
4. The lion tamer is bald.

Who is the clown?

- ⑦ Three men, A, B, and C, were traveling with their wives, a, b, and c. They came to a river which they had to cross. There was just one boat and only two could cross at one time. Since the husbands were jealous, no woman could be left with a man unless her husband were also present. How did they get across the river?

- ⑧ Find the number that logically continues each of these series:

- a) 2, 3, 5, 9, 17, _____
- b) 14, 19, 29, 40, 44, 52, _____

Did the Farmer Hurt Any Cows When He Lost Control of His Tractor?

Solve each problem below. Find your answer in the answer column and notice the two letters next to it. Write these letters in the two boxes that contain the number of that exercise.

① Two numbers are in the ratio 5 : 2 and their sum is 56. Find the numbers.
 _____ , _____

② Find two numbers whose ratio is 3 : 7 and whose sum is 150.
 _____ , _____

③ A certain color is made by blending red paint and blue paint in a 9 : 4 ratio. How many liters of each are needed to make 65 liters of this color?
 _____ ℓ , _____ ℓ

④ A commission of \$1000 is to be divided between two people in a 3 : 5 ratio. How much should each person receive?
 \$ _____ , \$ _____

⑤ Three numbers are in a 2 : 3 : 5 ratio and their sum is 70. Find the numbers.
 _____ , _____ , _____

⑥ The sum of the angle measures of any triangle is 180°. Find the three angle measures of a triangle if they are in an 8 : 3 : 4 ratio.
 _____ ° , _____ ° , _____ °

⑦ A grass seed mixture contains bluegrass, ryegrass, and fescue seeds in a 4 : 3 : 1 ratio. How many ounces of each seed are contained in a 3 pound (48 ounce) box of the mix?
 _____ oz , _____ oz , _____ oz

⑧ A market carries five flavors of ice cream. They sell in approximately a 2 : 2 : 3 : 6 : 7 ratio. How many cartons of each should be stocked if there is space for 80 cartons?
 _____ , _____ , _____ , _____ , _____

⑨ The width and length of a rectangular poster are in a 2 : 3 ratio. The perimeter of the poster is 160 cm. Find its dimensions.
 _____ cm , _____ cm

Why Is a Good Grade in Algebra Like a Puppy in Antarctica ?

Solve each problem and find your answer in the rectangle below. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

1	If there are 560 calories in 8 ounces of meat, how many calories are in 3 ounces of meat? _____ calories
2	If 2 cubic feet of sawdust weigh 25 pounds, how much do 9 cubic feet of sawdust weigh? _____ pounds
3	A certain hose delivers 5 gallons of water in 24 seconds. How much water will the hose deliver in 10 minutes? _____ gallons
4	The ratio of the weight of an object on Mars to its weight on Earth is 9 to 25. If a person weighs 120 pounds on Earth, how much would the person weigh on Mars? _____ pounds
5	A flagpole casts a shadow 8.5 meters long. If an algebra student 1.6 meters tall casts a shadow 2.0 meters long at the same time and location, how tall is the flagpole? _____ meters
6	A U.S. nickel is composed of 3.9 grams of copper and only 1.2 grams of nickel. How many kilograms of copper must be combined with 4 kilograms of nickel in the manufacture of nickel coins? _____ kilograms
7	At a certain college, the ratio of men to women is 6 to 5. If there are 2580 men, how many women are there? _____ women
8	In a town of 30,000 households, a survey was taken to estimate the number of households in which a certain TV program had been viewed. Of the 200 residences surveyed, the program had been seen in 64. Assuming that this was a representative sample, estimate the total number of households in the town in which the program was viewed. _____ households

What Sound Did the Sheep Hear When Her Sister Exploded?

Solve each equation and find your answer in the rectangle below. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

$$\textcircled{1} \quad \frac{2}{x+3} + \frac{3}{x+4} = \frac{7}{x^2 + 7x + 12}$$

$$\textcircled{2} \quad \frac{4}{x-5} + \frac{1}{x+2} = \frac{2x+7}{x^2 - 3x - 10}$$

$$\textcircled{3} \quad \frac{a-30}{a^2 + 4a - 21} = \frac{5}{a+7} - \frac{2}{a-3}$$

$$\textcircled{4} \quad \frac{x}{x+4} = \frac{3}{x-1}$$

$$\textcircled{5} \quad \frac{6}{y+2} + \frac{1}{y-2} = 1$$

$$\textcircled{6} \quad \frac{3}{n} + \frac{2}{n-1} = 2$$

$$\textcircled{7} \quad 2 = \frac{x}{x+3} - \frac{3}{x-5}$$

$$\textcircled{8} \quad \frac{1}{d-7} + \frac{d}{d-2} = \frac{5}{d^2 - 9d + 14}$$

$$\textcircled{9} \quad \frac{x-1}{x+1} - \frac{6}{x-3} = 3$$

Why Was the Dirty Old Hotel Called “The Fiddle”?

Do each exercise below and find your answer at the bottom of the page. Write the letter of that exercise above your answer.

- (S) 67% of 24
- (I) 4% of 9.25
- (H) $2\frac{1}{2}\%$ of 60
- (N) 100% of 77
- (T) 180% of 29
- (U) 0.6% of 42.5
- (W) 37.5% of 80
- (A) 250% of 1.7
- (I) $1\frac{3}{4}$ of 4
- (E) 0.12% of 5000
- (S) $87\frac{1}{2}\%$ of 200
- (A) 1% of 9.9
- (I) Zoomer Bix plans to buy a microcomputer that costs \$690, excluding sales tax. If the sales tax rate is $5\frac{1}{2}\%$, how much tax will Zoomer have to pay?
- (C) Wheel World sold 875 cars last year. If sales this year are 120% of sales last year, how many cars will Wheel World sell this year?
- (V) Klutz Schlump borrowed \$500. He agreed to pay back the entire loan, plus interest, at the end of the year. If the interest rate is 18% per year, what is the total amount Klutz agreed to pay back?
- (N) The “suggested retail” price of a certain camera is \$340, but a discount store sells the camera at a 30% discount. What is the price of the camera at the discount store?
- (L) Mr. J. Doe has a taxable income of \$9000. If the income tax rate is 16% on the first \$4000 of income, 19% on the next \$4000, and 23% on the next \$1000, how much is Mr. Doe’s tax?

What Is the Title of This Picture?

CODED TITLE:

18 11 32 11 200 45 60 11.34 11 18

5 25.2 200 45 54.12 200 25.2 24 24 60 11.34 30

7 200 7 85 25.2 200 70 6.4 7 18 11

TO DECODE THE TITLE OF THIS PICTURE:

Find what number should go in the blank in each exercise below. Each time this number appears in the code, write the letter of that exercise above it.

- (N) 21% of 54 = _____
 (O) 7% of 360 = _____
 (G) 40% of 75 = _____
 (I) _____ % of 40 = 24
 (T) _____ % of 25 = 8
 (A) _____ % of 500 = 35

- (C) 66% of 82 = _____
 (E) _____ = 4% of 275
 (L) _____ = 80% of 8
 (W) _____ % of 90 = 4.5
 (Z) 10.2 = _____ % of 12
 (S) 14.4 out of 60 = _____ %

- (B) 30% of _____ = 21
 (M) 8% of _____ = 3.6
 (D) 75% of _____ = 13.5
 (R) 3% of _____ = 6

DAFFYNYTION DECODER

1. Sleeping Bag:

____ _
 225 $33\frac{1}{3}$ 31.2 7000 $33\frac{1}{3}$ 15 45

2. Twins:

____ _
 90 1.25 140 $26\frac{2}{3}$ 140 $33\frac{1}{3}$ 224 3.5 7000

3. Buckshot:

____ _
 $33\frac{1}{3}$ 200 1.25 19.6 19.6 $33\frac{1}{3}$ 32 90 $33\frac{1}{3}$ 7000 224 3.5 200

TO DECODE THESE THREE DAFFYNYTIONS:

Find what number should go in the blank in each exercise below. Each time this answer appears in the code, write the letter of the exercise above it. Keep working and you will decode "define" print.

(T) 70% of 320 = _____

(P) 130% of 24 = _____

(O) 2.5% of 50 = _____

(C) _____ % of 80 = 12

(B) 4 out of 15 = _____ %

(E) 2.1 out of 60 = _____ %

(K) 20% of _____ = 9

(R) 6% of _____ = 1.92

(D) $1\frac{1}{2}$ % of _____ = 3

(N) $37\frac{1}{2}$ % of 600 = _____

(L) _____ = 280% of 7

(M) _____ % of 25 = 35

(A) 18 = _____ % of 54

(W) 110% of _____ = 99

(S) 7 = 0.1% of _____

When the Snake Charmer Married the Undertaker, What Did They Have Monogrammed on Their Towels ?

Solve each problem below. Find your answer in the answer column and notice the letter next to it. Write this letter in each box that contains the number of that problem.

Why Is a Plowed Field Like Feathered Game ?

Solve each problem below and find the solution at the bottom of the page.
Write the letters next to the problem in the two boxes above the solution.

- IS** Nuts to You Shoppe sells cashews for \$15 per kg and pecans for \$10 per kg. How many kilograms of each should be mixed in order to get 20 kg of a mixture worth \$12 per kg?
 _____ kg of cashews
 _____ kg of pecans
- ES** Coffee Grounds, Inc., has two kinds of coffee. Coffee A costs \$9 per kg and Coffee B costs \$6 per kg. How many kilograms of each should be combined to obtain 150 kg of a blend worth \$8 per kg?
 _____ kg of Coffee A
 _____ kg of Coffee B
- RT** C and Y Candy Company mixes candy that costs \$6.00 per kg with candy that costs \$4.50 per kg. How many kilograms of each are needed to make a 3 kg box that costs \$15.00?
 _____ kg of \$6.00 candy
 _____ kg of \$4.50 candy
- IT** Trail Snax Corp. mixes raisins that cost \$5.00 per kg with peanuts that cost \$3.80 a kg. How many kilograms of raisins should be mixed with 10 kg of peanuts to obtain a mixture worth \$4.00 per kg?
 _____ kg of raisins
- RI** Ground beef sells for \$4.75 per kg and ground pork sells for \$5.50 per kg. How many kilograms of ground pork should be mixed with 8 kg of ground beef to make a mixture that sells for \$5.10 per kg?
 _____ kg of pork
- PA** Speed Seed Company mixes bluegrass seed that costs \$7.60 per kilogram with ryegrass seed that costs \$6.25 a kg. How many kilograms of bluegrass seed should be mixed with 200 kg of ryegrass seed to make a mixture worth \$7.00 per kg?
 _____ kg of bluegrass
- DG** A card company mixes two varieties of cards. Embossed cards cost \$.65 each, and regular cards \$.40 each. How many cards of each type should be included in an assortment of 25 cards that costs \$14.00?
 _____ embossed cards
 _____ regular cards

CRYPTIC QUIZ

1. Why did the little girl paint spots on the staircase?

Answer:

14 7 4 3 11 14 11 14 15 4 1 9 2 15 15 4 12

2. What do you call a thirty-six-inch two-by-four?

Answer:

11 10 6 13 8 4 12 5 11 12 9

Solve each equation for y in terms of x . Find your answer below and notice the letter next to it. Each time the exercise number appears in the code, write this letter above it.

① $x + y = 5$

② $-3x + y = -2$

③ $x - y = 7$

④ $-4x - y = 1$

⑤ $3x - y = -10$

Answers:

Ⓔ $y = -4x - 1$

Ⓕ $y = 3x - 1$

Ⓟ $y = -x + 5$

Ⓦ $y = x - 7$

Ⓨ $y = 3x + 10$

Ⓞ $y = 3x - 2$

⑥ $-x + 2y = 6$

⑦ $x - 2y = 2$

⑧ $-2x + 3y = -12$

⑨ $5x + 2y = 1$

⑩ $4x - 3y = -2$

Answers:

Ⓓ $y = -\frac{5}{2}x + \frac{1}{2}$

Ⓤ $y = \frac{1}{2}x + 3$

Ⓛ $y = \frac{4}{3}x + \frac{2}{3}$

Ⓖ $y = \frac{3}{4}x - 4$

Ⓗ $y = \frac{1}{2}x - 1$

Ⓑ $y = \frac{2}{3}x - 4$

⑪ $3x + 2y - 6 = 0$

⑫ $x - 4y + 2 = 0$

⑬ $-2x - 6y = 0$

⑭ $8y - 3x = -6$

⑮ $7x = 2y$

Answers:

Ⓝ $y = \frac{4}{3}x + \frac{1}{4}$

Ⓢ $y = \frac{3}{8}x - \frac{3}{4}$

Ⓡ $y = \frac{1}{4}x + \frac{1}{2}$

Ⓐ $y = -\frac{3}{2}x + 3$

Ⓣ $y = \frac{7}{2}x$

Ⓜ $y = -\frac{1}{3}x$

What Did the Doctor Say After Examining Yunn Yunsberger?

Complete the table for each function. Find each ordered pair at the bottom of the page and write the corresponding letter above it. (Answers for Exercises 1–4 are to the left, and answers for Exercises 5–8 are to the right of the center line.)

Find the x-intercept and the y-intercept of the graph of each equation below. Then find your answer in the answer column nearest the exercise and notice the word under it. Write this word in the box containing the letter of that exercise. Keep working and you will hear about a novel name.

A $3x + 2y = 6$

B $3x - 2y = 6$

C $-5x + 3y = 15$

D $5x + 3y = -15$

E $x - 2y = 4$

F $-2x + y = -4$

G $2x + y = 5$

H $-3x + 2y = 9$

I $-x - 4y = 6$

J $4x - 3y - 12 = 0$

K $5y = 2x - 10$

L $x = 2y - 3$

What Might You Have If You Don't Feel Well ?

For each exercise, draw a line through the two given points. Determine the *slope* of this line. Find your answer at the bottom of the page and write the letter of that exercise above it.

- E (1, 2) and (4, 4)
- G (-4, -2) and (2, -5)

Why Are There Rules in Croquet ?

Solve each problem below using a system of two equations in two variables. Find the solution in the answer column and notice the three letters next to it. Write these letters in the three boxes at the bottom of the page that contain the number of that exercise.

- ① The sum of two numbers is 90. Their difference is 18. Find the numbers.
- ② The second of two numbers is 4 more than the first. The sum of the numbers is 56. Find the numbers.
- ③ The number of girls at Sky High School is 60 greater than the number of boys. If there are 1250 students all together, how many girls are there?
- ④ The second of two numbers is 5 more than twice the first. The sum of the numbers is 44. Find the numbers.
- ⑤ The sum of two numbers is 75. The second number is 3 less than twice the first. Find the numbers.
- ⑥ The larger of two numbers is 8 more than four times the smaller. If the larger is increased by four times the smaller, the result is 40. Find the numbers.
- ⑦ The number of calories in a piece of pie is 20 less than three times the number of calories in a scoop of ice cream. The pie and ice cream together have 500 calories. How many calories are in each?
- ⑧ The sum of two numbers is 4 less than twice the larger. If the larger is decreased by three times the smaller, the result is -20 . Find the numbers.

Did You Hear About...

A	B	C	D	E	F
G	H	I	J	K	L
					?

Solve each system of equations below using multiplication with the addition method. Find the solution in the answer column and notice the word next to it. Write this word in the box containing the letter of that exercise. Keep working and you will hear about some "udder" nonsense.

(A) $5x - 2y = 4$
 $3x + y = 9$

(G) $3x - 5y = 7$
 $5x - 2y = -1$

(B) $3x - 5y = 13$
 $x - 2y = 5$

(H) $4x + 3y = 9$
 $3x + 4y = 12$

(C) $7x + 2y = -1$
 $3x - 4y = 19$

(I) $5x - 3y = 16$
 $4x + 5y = -2$

(D) $x + 2y = 6$
 $5x + 3y = 2$

(J) $4x - 3y = -20$
 $-x - 8y = 5$

(E) $2x + 3y = 7$
 $3x + 4y = 10$

(K) $-3x + 7y = -1$
 $-2x + 5y = 0$

(F) $7x - 3y = -5$
 $3x + 2y = 11$

(L) $5x + 6y = -11$
 $3x + y = -4$

What Do You Get If You Drop a Grand Piano Down a Mine Shaft?

Solve each system of equations below using multiplication with the addition method. Find the solution at the bottom of the page and write the letter of that exercise in the box above it.

(A) $2(x - y) = 4$
 $3x + y = 10$

(I) $a - 2b = -5$
 $3(2a + b) = 0$

(R) $5x - y = 2x + 9$
 $3x + 4y = -6$

(T) $2(x - 3y) = x + 4$
 $3x + 8 = 5x - y$

(A) $\frac{1}{3}(2x + y) = 1$
 $x + y = 4$

(O) $\frac{1}{2}(m - 3n) = 5$
 $3(m + 4n) = -12$

(F) $\frac{x}{3} + \frac{y}{2} = -4$
 $x - 3y = 6$

(M) $\frac{x}{2} + \frac{y}{5} = \frac{13}{10}$

$3(x - y) = x - 10$

(N) $\frac{1}{5}(x + 2y) = -2$

$\frac{x}{4} - \frac{3y}{2} = \frac{15}{2}$

(L) $\frac{a}{6} + \frac{b}{4} = \frac{5}{2}$

$\frac{2a}{3} - \frac{b}{2} = -2$

What Kind of Monkey Can Fly?

Solve each problem below using a system of two equations in two variables. Find the solution in the answer column and notice the letter next to it. Write this letter in each box that contains the number of that exercise.

- ① Three times the larger of two numbers is equal to four times the smaller. The sum of the numbers is 21. Find the numbers.
- ② The difference between two numbers is 16. Five times the smaller is the same as 8 less than twice the larger. Find the numbers.
- ③ The larger of two numbers is 1 more than twice the smaller. The sum of the numbers is 20 less than three times the larger. Find the numbers.
- ④ Two records and three tapes cost \$31. Three records and two tapes cost \$29. Find the cost of each record and each tape.
- ⑤ The sum of two numbers is the same as four times the smaller number. If twice the larger is decreased by the smaller, the result is 30. Find the numbers.
- ⑥ A group of students go out for lunch. If two have hamburgers and five have hot dogs, the bill will be \$8.00. If five have hamburgers and two have hot dogs, the bill will be \$9.50. What is the price of a hamburger?
- ⑦ The price of a sweater is \$5 less than twice the price of a shirt. If four sweaters and three shirts cost \$200, find the price of each shirt and each sweater.
- ⑧ A shipment of TV sets, some weighing 30 kg each and the others weighing 50 kg each, has a total weight of 880 kg. If there are 20 TV sets all together, how many weigh 50 kg?

What Do You Call a Cow After She Has a Baby?

Solve each problem using a system of two equations in two variables. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ① A boat travels 60 km upstream (against the current) in 5 hours. The boat travels the same distance downstream in 3 hours. What is the rate of the boat in still water? What is the rate of the current?
- ② When a plane flies into the wind, it can travel 3000 km in 6 hours. When it flies with the wind, it can travel the same distance in 5 hours. Find the rate of the plane in still air and the rate of the wind.
- ③ When Lucy swims with the current, she swims 18 km in 2 hours. Against the current, she can swim only 14 km in the same time. How fast can Lucy swim in still water? What is the rate of the current?
- ④ With the wind, a jet can fly 2500 km in 2 h 30 min. Against the wind, it can fly only 2000 km in the same time. Find the rate of the jet in still air and the rate of the wind.
- ⑤ On an upstream trip, a canoe travels 40 km in 5 hours. Downstream, it travels the same distance in half the time. What is the rate of the canoe in still water and the rate of the current?
- ⑥ A duck can fly 2400 m in 10 min with the wind. Against the wind, it can fly only two thirds of this distance in 10 min. How fast could the duck fly in still air? What is the rate of the wind?
- ⑦ With the wind, a plane flew 1400 km in 4 hours. On the return trip, the pilot was forced to land after 1 h 30 min, having traveled only 450 km. Find the rate of the plane in still air and the rate of the wind.
- ⑧ A salmon swims 100 m in 8 min downstream. Upstream, it would take the fish 20 min to swim the same distance. What is the rate of the salmon in still water? What is the rate of the current?

FACTS: A “one-L” Lama is a Tibetan monk.
 A “two-L” Llama is a beast of burden.
QUESTION: What is a “three-L” LLLama?

Solve each problem using a system of two equations in two variables. Find each answer below and cross out the letter above it. When you finish, the answer to the title question will remain.

- ① Larry is 8 years older than his sister. In 3 years, he will be twice as old as she is now. How old are they now?
- ② Barry is 8 years older than his sister. In 3 years, he will be twice as old as she will be then. How old is each now?
- ③ Jennifer is 6 years older than Sue. In 4 years, she will be twice as old as Sue was 5 years ago. Find their ages now.
- ④ Adam is 5 years younger than Eve. In 1 year, Eve will be three times as old as Adam was 4 years ago. Find their ages now.
- ⑤ Jack is twice as old as Jill. In 2 years, Jack will be 4 times as old as Jill was 9 years ago. How old are they now?
- ⑥ Four years ago, Katie was twice as old as Anne was then. In 6 years, Anne will be the same age that Katie is now. How old is each now?
- ⑦ Five years ago, Tom was one third as old as his father was then. In 5 years, Tom will be half as old as his father will be then. Find their ages now.

Where Do Electricians Like to Sleep When They Travel?

Solve each problem below using a system of two equations in two variables. Circle your answer in the answer list. When you finish, arrange the letters of the correct answers in order, from the letter of the smallest correct answer to the letter of the largest correct answer. Write the letters in this order in the boxes at the bottom of the page. Can you “digit”?

- ① The sum of the digits of a two-digit number is 9. The value of the number is 12 times the tens digit. Find the number.
- ② The sum of the digits of a two-digit number is 12. If 15 is added to the number, the result is 6 times the units digit. Find the number.
- ③ The sum of the digits of a two-digit number is 8. If the digits of the number are reversed, the new number is 18 less than the original number. Find the number.
- ④ The tens digit of a two-digit number is twice the units digit. If the digits are reversed, the new number is 36 less than the original number. Find the number.
- ⑤ The units digit of a two-digit number is 4 times the tens digit. If the digits are reversed, the new number is 54 more than the original number. Find the number.
- ⑥ The sum of the digits of a two-digit number is 11. If 27 is added to the number, the digits will be reversed. Find the number.
- ⑦ The units digit of a two-digit number is 1 less than 3 times the tens digit. If the digits are reversed, the new number is 45 more than the original number. Find the number.

What Did the Lady Say When a Gentleman Asked, “What Has Teeth and Flies Through the Air?”

Solve each problem using a system of two equations in two variables in two variables. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ① Rocky McFist spends a total of \$90 per week for karate lessons and ballet lessons. If the amount spent on karate lessons increases \$10 per week, it will be two thirds of the amount spent on ballet lessons. How much does Rocky spend on ballet lessons? _____
- ② Dr. D. Jones has a total of \$3000 invested in two stocks. Stock A pays dividends at the rate of 6% and Stock B at the rate of 8%. If her dividends from the two stocks total \$220 per year, how much did she invest in each stock?
Stock A _____, Stock B _____
- ③ The recipe for Junky Crunchies requires a total of 8 cups of sugar and flour together. If the recipe had called for $\frac{1}{4}$ cup more sugar, the amount of sugar would be half the amount of flour. How many cups of sugar does the recipe call for? _____

- ④ Ms. U. S. Bonds invested a total of \$4500, some at 9% per year and the rest at 6% per year. The return from the 9% investment exceeds that from the 6% investment by \$180. How much did she invest at each rate?
_____ at 9%, _____ at 6%
- ⑤ Prince Neva Ben Rich takes out two loans. He borrows \$800 more from a credit union that charges 12% interest than from a bank that charges 15% interest. If his interest payments total \$420 annually, how much does he borrow at each rate?
_____ at 12%, _____ at 15%
- ⑥ Tony and Cleo are donating some of their books to a hospital. If Tony contributes half of his books and Cleo gives one third of hers, they will donate a total of 30 books. If Tony gives two fifths of his books and Cleo contributes half of hers, they will donate a total of 31 books. How many books does each have?
Tony _____, Cleo _____

★ ★ ★ ★ TEST OF GENIUS ★ ★ ★ ★

① If a brick balances evenly with three quarters of a pound and three quarters of a brick, what is the weight of a whole brick?

② Arrange the digits 1 through 6 in the six boxes below so that the multiplication works out correctly.

③ An unusual dartboard is shown below. Each dart scores either 3 points or 8 points. Suppose you can throw as many darts as you like, and your score is obtained by adding all the 3s and 8s together. Make a list of *all* the scores that are *impossible* to attain.

④ Bonzo went to a carnival. At the first game, he paid 10¢ to get in, spent half the money he had left, and spent 10¢ to get out. At the second game, he spent 10¢ to get in, spent half the money he had left, and spent 10¢ to get out. At the third game, he spent 10¢ to get in, spent half the money he had left, and spent 10¢ to get out. Then he found he had no money left. How much money did Bonzo start with?

⑤ Ten bowling pins are set up in the usual way forming a triangle with the point facing the bowler. How can 3 pins be moved so that the 10 pins are still set up in the conventional manner but with the point of the triangle away from the bowler?

⑥ Borfin caught a big fish. Its head was 5 inches long. The tail was as long as the head plus half the body. The body was as long as the head plus the tail. How long was the fish?

⑦ A square piece of paper is folded in half vertically. If the resulting figure has a perimeter of 12 cm, what was the area of the original square?

⑧ What is the value of the following expression:

$$(x - a)(x - b)(x - c) \dots (x - z),$$

so that there are a total of 26 factors, with each letter of the alphabet subtracted from x in one of the factors?

What Did They Call the Duck Who Became a Test Pilot?

Follow the directions given for each section. Cross out each box in the rectangle below that contains a correct answer. When you finish, print the letters from the remaining boxes in the spaces at the bottom of the page.

I For each function, find the indicated values.

- ① $f(x) = 2x - 5$ A. $f(6)$ B. $f(1)$
 ② $f(x) = x^2 - 4$ A. $f(12)$ B. $f(-2)$
 ③ $g(x) = x^2 - 7x + 1$ A. $g(3)$ B. $g(0)$
 ④ $h(x) = \frac{x+3}{x^2+x-6}$ A. $h(4)$ B. $h(-1)$

II Find the range of each function for the given domain.

- ⑤ $f(x) = 3x + 2$ $D = \{-2, 0, 2\}$
 ⑥ $g(x) = 9 - 5x$ $D = \{-3, -1, 1\}$
 ⑦ $F(x) = 2x^2 - 1$ $D = \{5, 1, -4\}$
 ⑧ $h(x) = x^2 - 8x + 3$ $D = \{1, 0, -1\}$
 ⑨ $f(t) = \frac{t^2 + 4t}{t - 6}$ $D = \{4, 0, -4\}$
 ⑩ $G(n) = -n^2 + 2n + 3$ $D = \{-2, 1, 4\}$

SKETCHING FUNCTIONS I

Study each function below and then answer the questions at the bottom of the page.

- A. The quantity of gasoline consumed in the U.S. is a function of the price per gallon.

- B. The distance from the starting line of a runner in the 100-meter dash is a function of the time since the start.

- C. The height above ground of a cannon ball shot from a cannon is a function of the time since it was shot.

- D. The profit from a restaurant is a function of the number of meals that are served.

GRAPH A: Does this curve appear to have a positive slope or a negative slope? Why do you suppose this is the case?

GRAPH B: Why does this curve slope more steeply upward as time increases? What is the domain of this function? What is the range?

GRAPH C: When time equals 0, why is the height of the cannon ball not equal to 0? Describe the domain of this function. Describe the range.

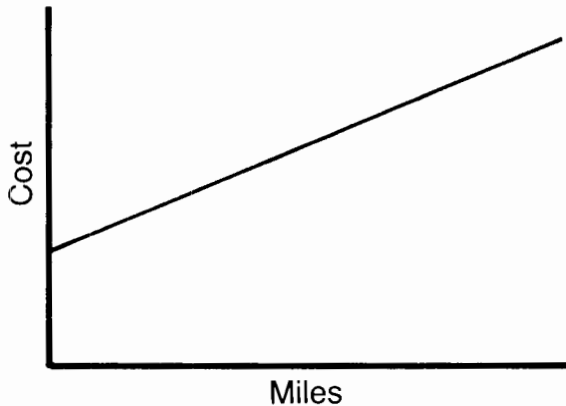

GRAPH D: Why does the range of this function include negative values? What is the significance of the point where the graph crosses the horizontal axis?

OBJECTIVE 1-c: To describe how real-world functional relationships can be represented by graphs, using concepts such as slope, domain, range, and initial conditions.

SKETCHING FUNCTIONS II

Study each function below and then answer the questions at the bottom of the page.

- A. The cost per month of owning a car is a function of the number of miles driven.

- B. The temperature in an oven set at 350°F is a function of the time since it was turned on.

- C. The time it takes to ride a bicycle 100 miles is a function of the average speed.

- D. The cost of postage for a first-class letter is a function of its weight in ounces.

GRAPH A: When the number of miles driven equals 0, why is the cost per month not equal to 0? Why does the graph have a positive slope?

GRAPH B: When time equals 0, why is the temperature in the oven not equal to 0? Why does the temperature eventually oscillate around 350°F ?

GRAPH C: How long does it take to ride a bicycle 100 miles at each of the following speeds: 5 mph, 10 mph, 15 mph, 20 mph, 25 mph? What is always true about the product $\text{speed} \times \text{time}$?

GRAPH D: Why does the graph look like a series of steps rather than a smooth curve? Why is a hollow circle needed at the beginning of each step (except the first)?

SKETCHING FUNCTIONS III

Make a sketch for each function described below. Use your knowledge of the relationships described.

- (A) At a fixed price per ounce, the cost of buying gold is a function of the number of ounces you buy.

- (B) The height of your head above the ground as you ride a Ferris wheel is a function of the time since you got on.

- (C) The total cost of operating a lemonade stand is a function of the amount of lemonade sold.

- (D) The profit from operating a lemonade stand is a function of the amount of lemonade sold.

- (E) The amount of water in a pan on a burner that is turned on "high" is a function of the time since the burner was turned on.

- (F) The height of a ball that is dropped from a height of 10 feet is a function of the time since it was dropped.

Why Did Grok Jump Up and Down the First Time He Saw a Variable in Algebra Class ?

Write an equation expressing direct variation for each exercise below. Find your answer in the answer column and notice the two letters next to it. Write these letters in the two boxes that contain the number of that exercise.

NOTE: Each constant of variation is given in decimal form, unless it equals a *repeating* decimal. Then, it is left as a fraction in lowest terms.

- ① y varies directly as x , and $y = 20$ when $x = 5$.
- ② y varies directly as x , and $y = 9$ when $x = 27$.
- ③ y varies directly with x , and $y = 40$ when $x = 16$.
- ④ y varies directly with x , and $y = 32$ when $x = 20$.
- ⑤ y is directly proportional to x , and $y = -10$ when $x = -15$.
- ⑥ y is directly proportional to x , and $y = 300$ when $x = -60$.
- ⑦ y is directly proportional to x , and $y = 17$ when $x = 17$.
- ⑧ y varies directly as x , and $y = 1.2$ when $x = 1.6$.
- ⑨ The distance, y , traveled at a fixed rate of speed varies directly with the time of travel, x . Write an equation if $y = 250$ m when $x = 25$ sec.
- ⑩ The amount of interest, y , paid on a loan is directly proportional to the amount borrowed, x . Write an equation if $y = \$75$ when $x = \$500$.
- ⑪ The circumference, y , of a circle varies directly with the diameter, x , of the circle. Write an equation if $y = 44$ cm when $x = 14$ cm.

- | | |
|----|---------------------|
| BI | $y = 6.2x$ |
| NG | $y = 2.5x$ |
| MO | $y = -5x$ |
| VE | $y = 0.45x$ |
| SA | $y = 4x$ |
| SI | $y = 10x$ |
| LL | $y = 3.5x$ |
| NT | $y = \frac{1}{3}x$ |
| ME | $y = 0.75x$ |
| NX | $y = \frac{22}{7}x$ |
| GH | $y = \frac{2}{3}x$ |
| TI | $y = 0.15x$ |
| IT | $y = 1.6x$ |
| NA | $y = 0.13x$ |
| WA | $y = x$ |
| KI | $y = -3.4x$ |

Direct Variation "Grafun"

-
1. Why does the graph of an equation expressing direct variation always pass through the origin?
 2. As k increases from 0.15 to 10, what happens to the graph of $y = kx$? Describe the graph when k is negative.
 3. What is the meaning or significance of k in the equation for Exercise 9? For Exercise 10? For Exercise 11?

What Do You Have When a Teacher Tells Two Students to Stop Talking and Do Their Work ?

Solve each problem and find your answer in the rectangle below. Cross out the box that contains your answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

1 The amount of money earned on a job is directly proportional to the number of hours worked. If \$36 is earned for 8 hours of work, how much is earned for 30 hours of work?

\$ _____

2 The height that a ball bounces varies directly with the height from which it is dropped. A certain ball bounces 30 cm when dropped from a height of 50 cm. How high will the ball bounce if dropped from a height of 120 cm?

_____ cm

3 The amount that a spring stretches is directly proportional to the weight of the object attached to it. If a spring is stretched 10 cm by a weight of 8 kg, how much will it be stretched by a weight of 3 kg?

_____ cm

4 The number of calories in a container of milk is directly proportional to the amount of milk in the container. If there are 160 calories in an 8-ounce glass of milk, find the number of calories in a 15-ounce glass of milk.

_____ cal

5 The number of kilograms of water in a person's body varies directly as the person's mass. A person with a mass of 90 kg contains 60 kg of water. How many kilograms of water are in a person with a mass of 50 kg?

_____ kg

6 On a certain map, 25 km are represented by 2 cm. If two cities are 7 cm apart on the map, what is the actual distance between them?

_____ km

7 The amount of fertilizer needed for a lawn varies directly with the area of the lawn. If 4 pounds of fertilizer are needed for 500 square feet of lawn, how much is needed for Dr. Quagmire's lawn, which is rectangular in shape and measures 25 feet by 50 feet?

_____ lb

TW	A	TW	NO	OS	WO	RD
3.75	9.4	10	324	$33.\bar{3}$	72	76
ER	NE	ED	IT	PA	N	IR
$31.\bar{6}$	300	144	135	83.5	87.5	4.2

Why Did Miss Muffet Need a Road Map?

Write an equation expressing inverse variation for each exercise below. Find your answer in the corresponding set of answer boxes, and print the letter of the exercise above it.

- (O) y varies inversely as x , and $y = 25$ when $x = 3$.
- (S) y varies inversely as x , and $y = 7$ when $x = 12$.
- (E) y is inversely proportional to x , and $y = 3.5$ when $x = 8$.
- (T) y is inversely proportional to x , and $y = 0.4$ when $x = 0.9$.
- (L) The time, t , it takes to travel a certain distance varies inversely as the speed, s . Write an equation if $t = 10$ h when $s = 80$ km/h.
- (H) The length, ℓ , of a rectangle with a constant area varies inversely as the width, w . Write an equation if $\ell = 7.2$ cm when $w = 5.0$ cm.
- (S) The time, t , required to do a certain job is inversely proportional to the number of people, n , working. Write an equation if $t = 15$ h when $n = 6$.

$t = \frac{820}{s}$	$y = \frac{84}{x}$	$\ell = \frac{36}{w}$	$y = \frac{28}{x}$	$t = \frac{115}{\ell}$	$t = \frac{800}{s}$	$y = \frac{75}{x}$	$t = \frac{90}{n}$	$y = \frac{0.36}{x}$	$\ell = \frac{31}{w}$

- (H) y varies inversely as x , and $y = -320$ when $x = -5$.
- (E) y is inversely proportional to x , and $y = 0.125$ when $x = -100$.
- (Y) y varies inversely as x , and $y = -9$ when $x = 28$.
- (R) y is inversely proportional to x , and $y = 2.5$ when $x = 0.4$.
- (H) The number of chairs, y , on a ski lift is inversely proportional to the distance, x , between them. Write an equation if $y = 40$ when $x = 30$ m.
- (E) The force, F , needed to lift an object with a crowbar varies inversely with the length, ℓ , of the crowbar. Write an equation if $F = 200$ kg when $\ell = 1.4$ m.
- (W) The frequency, f , of a sound wave is inversely proportional to the wavelength, ℓ . Write an equation if $f = 420$ Hz when $\ell = 0.8$ m.

$y = \frac{1800}{x}$	$y = \frac{1200}{x}$	$y = \frac{-12.5}{x}$	$y = \frac{1}{x}$	$f = \frac{324}{\ell}$	$f = \frac{336}{\ell}$	$y = \frac{1600}{x}$	$F = \frac{280}{\ell}$	$y = \frac{-252}{x}$	$F = \frac{264}{\ell}$

How Did Everybody Find Out About the New Corduroy Pillow Covers ?

Solve each problem below. Find your answer in the answer column and notice the letters next to it. Write these letters in the boxes at the bottom of the page that contain the number of that exercise.

① For rectangles with the same area, the length varies inversely as the width. One rectangle has a length of 12 cm and a width of 5 cm. Find the length of another rectangle with the same area whose width is 4 cm.

_____ cm

② The current in an electrical circuit varies inversely as the amount of resistance in the circuit. The current is 10 amps when the resistance is 24 ohms. Find the current when the resistance is 30 ohms.

_____ amps

③ The cost per person to rent a mountain cabin is inversely proportional to the number of people who share the rent. If the cost is \$36 per person when 5 people share, what is the cost per person when 8 people share?

\$ _____

④ The volume of a gas varies inversely as the pressure. A helium-filled balloon has a volume of 21 m³ at sea level, where the pressure is 1 atmosphere. The balloon rises to an altitude where the pressure is 0.7 atmospheres. What is its volume?

_____ m³

⑤ The number of chairs on a ski lift is inversely proportional to the distance between them. A lift has 70 chairs when they are spaced 24 m apart. If 80 evenly-spaced chairs are used on the lift, how much space will be left between them?

_____ m

⑥ For piano wires under the same tension, the number of vibrations per second (frequency) of each wire is inversely proportional to the length of the wire. A wire 0.75 m long vibrates 480 times per second. How long is a wire that vibrates 300 times per second?

_____ m

⑦ The time it takes to fly from Los Angeles to New York varies inversely as the speed of the plane. If the trip takes 6 h at 900 km/h, how long would it take at 800 km/h?

_____ h

KNOTTY

RIDDLE

The old, old rope was tied,
Tied hanging from a ring.
What did its old knot say
When a hippo asked to swing?

TO ANSWER THE RIDDLE ABOVE:

For each exercise, write an equation expressing direct or inverse variation as a square. Use k as the constant of variation. Then solve the two problems under the exercise. Find each answer at the bottom of the page and write the problem letter above it.

1. The distance, d , that a free-falling body falls varies directly as the square of the time, t , that it falls. If $d = 36$ m when $t = 3$ sec,

- (D) Find the value of k . _____
 (A) Find d when $t = 5$ sec. _____ m

2. The amount of material, M , needed to cover a ball is directly proportional to the square of the radius, r . If $M = 60$ cm² when $r = 2$ cm,

- (T) Find the value of k . _____
 (E) Find M when $r = 7$ cm. _____ cm²

3. The price, p , of a pizza varies directly as the square of its radius, r . If $p = \$6.00$ when $r = 10$ cm,

- (A) Find the value of k . _____
 (O) Find p when $r = 15$ cm. \$ _____

4. The brightness of illumination, I , of an object varies inversely as the square of its distance, d , from the source of illumination. If $I = 18$ luxes when $d = 4$ m,

- (I) Find the value of k . _____
 (K) Find I when $d = 3$ m. _____ luxes

5. The time, t , needed to fill the gas tank of a car varies inversely as the square of the diameter, d , of the hose. If $t = 5$ min when $d = 3$ cm,

- (M) Find the value of k . _____
 (F) Find t when $d = 2$ cm. _____ min

6. The electrical resistance, R , of a wire of a certain length is inversely proportional to the square of its diameter, d . If $R = 10$ ohms when $d = 0.6$ mm,

- (N) Find the value of k . _____
 (A) Find R when $d = 3$ mm. _____ ohms

7. The price, p , of a diamond is directly proportional to the square of its weight, w . If $p = \$2000$ when $w = 1$ carat,

- (Y) Find the value of k . _____
 (R) Find p when $w = 0.7$ carat. \$ _____

288	12.75	0.4	45	0.12	100	920	11.25	980	0.06	2000	735	4	2.5	32	3.6	13.50	15
-----	-------	-----	----	------	-----	-----	-------	-----	------	------	-----	---	-----	----	-----	-------	----

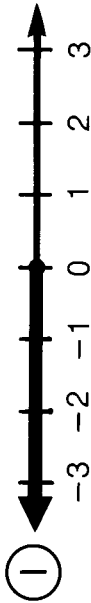

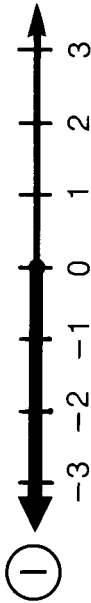

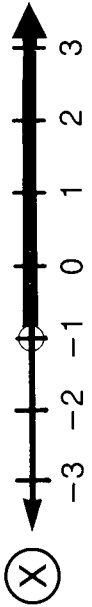

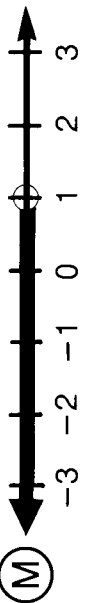

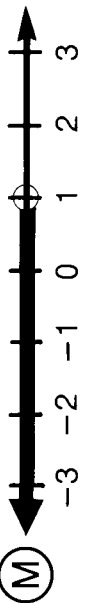

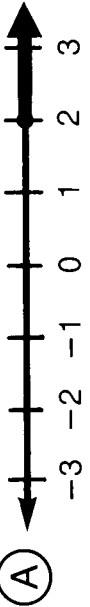

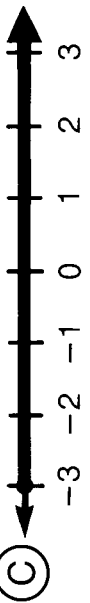

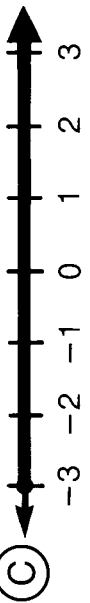

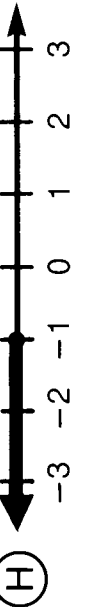

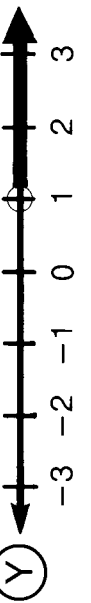

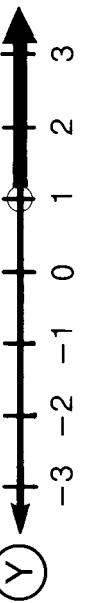

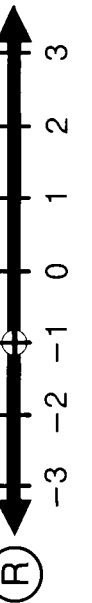

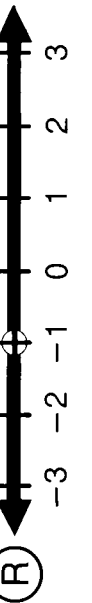

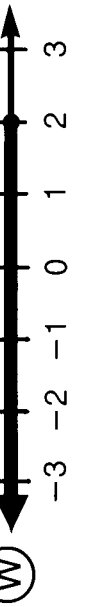

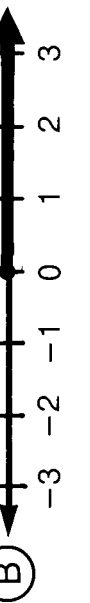

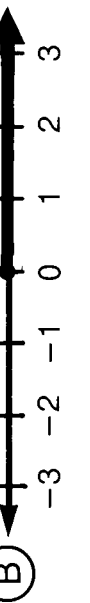

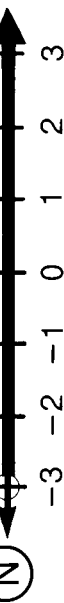

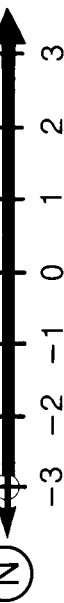

Translate each statement into a formula. Use k as the constant of variation.

- ① V varies jointly as B and h . _____
- ② t varies directly as W and inversely as n . _____
- ③ P varies directly as the square of V and inversely as R . _____
- ④ h varies directly as W and inversely as the square of r . _____
- ⑤ E varies jointly as m and the square of v . _____
- ⑥ I varies jointly as A and H and inversely as T . _____
- ⑦ The mass, m , of a cement block varies jointly as the length, ℓ , width, w , and thickness, t , of the block. _____
- ⑧ The volume, V , of a gas varies directly as the temperature, T , and inversely as the pressure, P . _____
- ⑨ The collision impact, I , of an automobile varies jointly as the mass, m , and the square of the speed, s . _____
- ⑩ The intensity of a sound, i , varies directly as the amplitude, A , of the sound source, and inversely as the square of the distance, d , from the source. _____
- ⑪ The safe load, s , for a beam, varies jointly as the breadth, b , and the square of the depth, d , and inversely as the length, ℓ , between supports. _____
- ⑫ The gravitational force, g , between two objects varies jointly as the mass of the first, m_1 , and the mass of the second, m_2 , and inversely as the square of the distance, d , between them. _____

What Happened When the Crossword Puzzle Champion Died?

Find the graph of the solution set of each inequality below in the corresponding column of graphs. Notice the letter next to it. Write this letter in each box containing the number of that exercise. Keep working and you will find out about this grave event.

① $x < 2$		⑩ $x < 1$		①	
② $x \leq 2$		⑪ $1 < x$		②	
③ $x > 2$		⑫ $-3 \leq x$		③

A FAMOUS LAST WORD IS HIDDEN IN THE RECTANGLE ABOVE. TO FIND IT: Express each fraction below as a repeating or terminating decimal. Express each decimal as a fraction in lowest terms. Find your answers in the rectangle. Shade in each area containing a correct answer.

Express as a repeating or terminating decimal:

- ① $\frac{7}{9}$ ② $\frac{3}{8}$ ③ $\frac{5}{12}$ ④ $\frac{11}{4}$

- ⑤ $\frac{3}{11}$ ⑥ $-\frac{5}{22}$ ⑦ $\frac{1}{16}$ ⑧ $-\frac{4}{7}$

Express as a fraction in lowest terms:

- ⑨ $0.\overline{8}$ ⑩ $-0.\overline{18}$ ⑪ $1.\overline{3}$ ⑫ $-0.\overline{21}$
- ⑬ 0.125 ⑭ $0.\overline{83}$ ⑮ $-0.08\overline{3}$ ⑯ $0.\overline{009}$

Why Does Mrs. Snuggle Call Her Sons' Ranch "SOLAR FOCUS"?

Simplify each expression below and find your answer in the corresponding set of answer boxes. Print the letter of that exercise in the box containing the answer.

What Do Sea Monsters Eat?

Complete each statement below with one of the answers at the bottom of the page. Write the letter of each statement above its correct answer.

S	A number that can be written as a fraction $\frac{a}{b}$, where a and b are integers and $b \neq 0$, is a _____.
I	A fraction can be changed to a decimal by dividing the _____.
A	When a fraction is changed to a decimal and the remainder is zero, the decimal is called a _____.
D	When a fraction is changed to a decimal and the remainder is NOT zero, a digit or block of digits will eventually start to repeat. Such a decimal is called a _____.
S	Thus, since a rational number is a number that can be written as a fraction, every rational number can be expressed as either a _____ decimal.
H	The reverse is also true. Every terminating or repeating decimal represents a rational number and can be changed to a _____.
F	A number that CANNOT be expressed as a fraction $\frac{a}{b}$, where a and b are integers, is an _____.
H	Terminating and repeating decimals represent rational numbers. Therefore, the decimals for irrational numbers neither terminate nor _____.
I	Instead, the decimal for an irrational number is an endless string of digits that never repeats and never _____.
N	An example of an irrational number is _____.
P	The union of the set of rational numbers and the set of irrational numbers is called the set of _____.
S	Every decimal represents a real number, and every real number can be represented as a _____.

irrational number	terminates	rational number	fraction	0.1212121212 . . .	terminating decimal	0.1212212221 . . .	repeating decimal	integer	decimal	repeat	numerator by the denominator	real numbers	terminating or repeating

Why Didn't Krok Like to Go Sailing With the Baseball Uniform Designer?

Simplify each expression below and find your answer in the corresponding answer column. Write the letter of the exercise in the box that contains the number of the answer.

How Do You Write a Song That Will Knock Over a Cow?

Solve each problem below. Cross out the box that contains your answer. When you finish, print the letters from the remaining boxes in the spaces at the bottom of the page.

- ① For each right triangle, find the length of the side that is not given:

A

B

C

- ② A rectangle is 7 cm wide and 10 cm long. Find the length of a diagonal of the rectangle.

- ③ Each side of an equilateral triangle measures 30 cm. Find the length of an altitude, a , of the triangle.

- ④ A television set may be described in terms of the diagonal measure of its screen. If a TV screen is 16 inches by 12 inches, what is the length of its diagonal?

- ⑤ A 20-foot ladder is leaned against a wall. If the base of the ladder is 8 feet from the wall, how high up on the wall will the ladder reach?

- ⑥ The bases of a softball diamond are 60 feet apart. How far is it from home plate to second base?

- ⑦ Jack has let out 40 m of kite string when he observes that his kite is directly above Jill. If Jack is 25 m from Jill, how high is the kite?

Why Was the Pail Pale?

Simplify each expression. Find your answer below and notice the letter next to it. Write this letter in each box containing the number of that exercise.

① $7\sqrt{2} + \sqrt{50} - 2\sqrt{18}$

② $\sqrt{7} + \frac{\sqrt{7}}{2}$

③ $\sqrt{3} + \sqrt{\frac{1}{3}}$

④ $3\sqrt{\frac{1}{2}} + \sqrt{2}$

⑤ $2\sqrt{5} + 3\sqrt{\frac{1}{5}}$

⑥ $10\sqrt{\frac{3}{5}} - 24\sqrt{\frac{5}{3}}$

⑦ $\sqrt{\frac{3}{2}} + 3\sqrt{\frac{1}{6}}$

⑧ $5\sqrt{\frac{1}{2}} - 2\sqrt{\frac{1}{8}}$

⑨ $\sqrt{\frac{3}{8}} + \sqrt{\frac{2}{3}}$

⑩ $\sqrt{\frac{3}{4}} + \sqrt{12}$

⑪ $7\sqrt{10} - 2\sqrt{90} + 4\sqrt{\frac{1}{10}}$

⑫ $3\sqrt{\frac{2}{9}} + \frac{1}{2}\sqrt{32} + \sqrt{\frac{9}{8}}$

Answers:

			?

Solve each problem below. If an irrational root occurs, round to the nearest tenth. Find your answer in the answer column and notice the word next to it. Write this word in the box containing the letter of the exercise. Keep working and you will hear about a joint joint.

- (A) The length of a rectangle is 4 m more than the width. The area of the rectangle is 45 m^2 . Find the length and width.
- (B) The length of a rectangle is three times the width. The area is 108 cm^2 . Find the dimensions of the rectangle.
- (C) The length of a photograph is 1 cm less than twice the width. The area is 28 cm^2 . Find the dimensions of the photograph.
- (D) A square field had 3 m added to its length and 2 m added to its width. The field then had an area of 90 m^2 . Find the length of a side of the original field.
- (E) The length of a rectangular mural is 2 m greater than the width. The area is 20 m^2 . Find the dimensions of the mural.
- (F) The length of a rectangle is 6 cm more than the width. The area is 11 cm^2 . Find the length and width.
- (G) The length of a rectangular garden is 4 m greater than the width. The area is 71 m^2 . Find the dimensions of the garden.
- (H) The length of a rectangular park is 2 km less than twice the width. The area is 9 km^2 . Find the dimensions of the park.

2 cm by 14 cm	JOINT

Once upon a time a mother skunk had two baby skunks, named In and Out. When Out was in, In was out. One day, In went out and Out came in, and the mother skunk sent Out out to bring In in. How did Out find In?

Solve each problem below. If an irrational root occurs, round to the nearest tenth. Find your answer at the bottom of the page and cross out the letter above it. When you finish, the answer to the title question will remain.

- ① The base of a triangle is 3 cm longer than its altitude. The area of the triangle is 35 cm^2 . Find the altitude. (Hint: The area of a triangle equals $\frac{1}{2} \cdot \text{base} \cdot \text{altitude}$.)

- ② The altitude of a triangle is 2 cm shorter than its base. The area is 15 cm^2 . Find the base of the triangle.

- ③ A flower garden is in the shape of a right triangle. The longest side of the triangle measures 13 m. One of the shorter sides is 7 m longer than the other. Find the length of the shortest side. (Hint: Use the Pythagorean Theorem: $a^2 + b^2 = c^2$.)

- ④ The diagonal measure of a movie screen is 6 m. The length of the screen is 2 m greater than the height. Find the dimensions of the screen.

- ⑤ A square picture is mounted in a frame 1 cm wide. The area of the picture is $\frac{2}{3}$ of the total area. Find the length of a side of the picture.

- ⑥ A rectangular pond measures 3 m by 5 m. A concrete walk of uniform width is constructed around the pond. If the walk and pond together cover an area of 39 m^2 , how wide is the walk?

- ⑦ A rectangular counter is covered with 600 square tiles. The counter could have been covered with 400 tiles 1 cm longer on a side. Find the length of a side of the smaller tile.

What Did the Prince Do Whenever He Found a Girl Who Might Be Cinderella?

Use the table of trigonometric ratios to do each exercise. Find each answer at the bottom of the page and write the letter of the exercise above it.

Find the following:

- (T) $\sin 25^\circ$ (H) $\tan 35^\circ$ (E) $\cos 10^\circ$ (E) $\cos 80^\circ$ (O) $\sin 70^\circ$ (A) $\tan 45^\circ$

Use the figure at the right for the remaining exercises.

- (W) If $m\angle A = 20^\circ$, then $\frac{a}{c} =$
- (O) If $\frac{a}{c} = 0.5736$, then $m\angle A =$
- (E) If $m\angle A = 75^\circ$, then $\frac{b}{c} =$
- (N) If $\frac{b}{c} = 0.5000$, then $m\angle A =$
- (E) If $m\angle A = 55^\circ$, then $\frac{a}{b} =$
- (T) If $\frac{a}{b} = 0.8391$, then $m\angle A =$
- (D) If $m\angle B = 5^\circ$, then $\frac{a}{c} =$
- (W) If $\frac{a}{c} = 0.4226$, then $m\angle B =$
- (T) If $m\angle B = 30^\circ$, then $\frac{b}{a} =$
- (N) If $\frac{b}{a} = 5.6713$, then $m\angle B =$
- (F) If $m\angle B = 50^\circ$, then $\frac{b}{c} =$
- (D) If $\frac{b}{c} = 0.2588$, then $m\angle B =$

Angle	Sin	Cos	Tan

What Do They Call the Big Grass Field on an Orbiting Satellite?

For the first eight exercises, find the length x . For the remaining exercises, find the length needed to solve the problem. Round each answer to the nearest tenth. Cross out each box that contains a correct answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

- ⑨ At a point 20 meters from a flagpole, the angle of elevation of the top of the flagpole is 48° . How tall is the flagpole?
- ⑩ If a rocket flies 2° off course for 1000 miles, how far from the correct path will the rocket be?
- ⑪ As it leans against a building, a 9-meter ladder makes an angle of 55° with the ground. How far is the bottom of the ladder from the base of the building?

TH	AP	ET	E	AR	UN	A	KI	SS

18.5 cm	3.2 m	7.3 cm	63.6 m	34.9 mi	15.3 cm	10.9 m	16.9 cm	17.1 cm

● DAFFYNYTION DECODER ●

EUROPE:

30°	42°	21°	24°	74°	2°	21°	24°	37°	49°	2°	42°	17°	32°	5°	2°
-----	-----	-----	-----	-----	----	-----	-----	-----	-----	----	-----	-----	-----	----	----

UNDERGROUND GARAGE:

46°	5°	9°	9°	28°	2°	42°	7°	46°	5°	9°	9°	7°	51°	5°	24°	68°	34°	2°
-----	----	----	----	-----	----	-----	----	-----	----	----	----	----	-----	----	-----	-----	-----	----

TO DECODE THE TWO DAFFYNYTIONS ABOVE: For the first nine exercises, find the measure of the angle indicated. For the remaining exercises, find the angle measure needed to solve the problem. Round to the nearest degree. Each time the answer appears in the code, write the letter of the exercise below it.

- (L) A driveway is built on an incline so that it rises 3 m over a distance of 20 m. What is the angle of elevation of the driveway?

- (R) Each step of a stairway rises 16 cm for a tread width of 36 cm. What angle does the stairway make with the floor?

- (B) A roof is constructed as shown in the diagram. Find the pitch (angle of elevation) of the roof.

- (T) A train decreases its altitude by 8 m when traveling along 200 m of track. Find the angle of depression of the track.

TEST OF GENIUS

- ① Each of Bork's bags contains the same number of marbles. He has twice as many bags as he has marbles in each bag. If he has 32 marbles in all, how many are in each bag?
- ② How many angles (less than 180°) are in the figure below?

- ③ The rectangle below is divided into square regions. Using the information given, find the area of each of these regions. Is the outside rectangle a square also?

- ④ Show that two WRONG's can make a RIGHT. Replace each different letter in the addition below with a different digit. It is required that $O = \text{zero}$.

$$\begin{array}{r} \text{WRONG} \\ + \text{WRONG} \\ \hline \text{RIGHT} \end{array}$$

- ⑤ Jennifer's brother Matthew has one more brother than he has sisters. How many more brothers than sisters does Jennifer have?
- ⑥ Rolex has five pieces of chain, each containing four links. He wants to join the pieces to form a circle. If it costs 10¢ to open a link, and 10¢ to close a link, find a way he can do this for only 80¢.

- ⑦ A, B, and C decide to play poker. They agree that when a player loses a hand, he will pay each of the others an amount equal to the amount each player already has. A loses the first hand and pays B and C the amount of money each has; B loses the second hand and pays A and C the amount of money each has; C loses the third hand and pays A and B the amount of money each has. At this point, each player has \$8. How much did each player start with?
- ⑧ Leather shoes are worn in bowling and rubber-soled sneakers in tennis. In what sport are all-metal shoes worn?

HAVE YOU SEEN
THE NEW PEN THAT
WRITES UNDER-
WATER, UPSIDE
DOWN, IN OUTER
SPACE, AND ALSO
LOTS OF OTHER
WORDS?

Page 29

He has a run track mind
(one-track).

**WHY DOES OSHGOSH JOG AROUND THE
HIGH SCHOOL TRACK 98 TIMES EVERY DAY?**

Solve each equation below. Draw a straight line connecting the dot by the equation to the dot by its solution. The line will cross a number and a letter. Put the letter in the matching numbered box at the bottom of the page.

① $x - 15 = -8$		-22
② $w - 3 = 24$		20
③ $x - 9 = -20$		7
④ $h - (-8) = 3$		62
⑤ $x - (-12) = -7$		-50
⑥ $15 = r - 6$		27
⑦ $-5 = x - (-17)$		-5
⑧ $x + 80 = 40$		35
⑨ $-16 + t = 7$		21
⑩ $x + 9 + 12 = -3$		-24
⑪ $x + 5 - 11 = -1$		16
⑫ $-24 + w + 8 = 4$		-11
⑬ $18 - 13 + n = -9$		-40
⑭ $40 = x + 6 - 28$		5
⑮ $-7 = 8 - 50 + x$		-12
⑯ $23 + h - 9 = 2$		-14
⑰ $-10 = w - 32 + 6$		-19
⑱ $x - (-75) = 25$		23

WHEN HE SITS ON
THE THROWN

When he sits on the
thrown (throne)

Page 91

For each exercise,
students must find one
factor in each column
of binomials. This
format discourages
"working backwards"
from the answers.
Students may need
some help getting
started.

1. $(3x + 1)(x + 2)$
2. $(2x + 3)(x + 1)$
3. $(3x - 1)(x - 5)$
4. $(7x - 2)(x - 1)$
5. $(2u + 1)(3u + 1)$
6. $(8u - 1)(u - 1)$
7. $(2u + 3)(5u + 1)$
8. $(3u - 2)(3u - 1)$
9. $(5u + 6)(u + 1)$
10. $(3n - 1)(n + 1)$
11. $(5n + 1)(n - 1)$
12. $(2n - 1)(n + 3)$
13. $(7n + 1)(n - 2)$
14. $(3t - 1)(t + 5)$
15. $(4t - 7)(t - 1)$
16. $(6t - 1)(t + 1)$
17. $(3t + 1)(t - 7)$

ROOMERS WERE
FLYING

Roomers (rumors)
were flying.

Page 92

You might emphasize
to students that they
should cross out TWO
boxes for each exercise.

1. $(6x + 1)(x + 3)$
2. $(5x + 1)(x - 2)$
3. $(3x + 1)(3x + 4)$
4. $(7x + 8)(x - 1)$
5. $(2x - 5)(x - 8)$
6. $(5m + 3)(3m + 2)$
7. $(8m + 3)(m - 1)$
8. $(4m - 9)(m - 2)$
9. $(14m - 11)(m + 2)$
10. $(3m - 10)(m + 3)$

DO YOU WANT TIBET
Do you want to bet?

Page 93

This puzzle is similar
to the one on page 91.
Students must find
one factor in each
column of binomials.

1. $(2n + 7)(2n - 7)$
2. $(n + 6)(n + 2)$
3. $(n - 4)(n - 5)$
4. $(n + 8)(n + 8)$
5. $(n + 5)(n - 3)$
6. $(3n - 5)(n - 1)$
7. $(a + 7)(a - 3)$
8. $(5a - 1)(a + 2)$
9. $(2a + 5)(a + 3)$
10. $(1 - 3a^2)(1 + 3a^2)$
11. $(a - 5)(a - 6)$
12. $(5a + 1)(2a - 1)$
13. $(8u + 3)(u + 2)$
14. $(5u - 2)(5u - 2)$
15. $(3u - 14)(u + 1)$
16. $(u + 3)(u - 7)$
17. $(3u + 10)(2u - 1)$
18. $(2u + 9)(u - 2)$

Page 149

You may wish to have students graph these equations. There is a suitable set of coordinate grids on page 147.

1. 3 9 -5
2. 2 -4 -7
3. 6 2 0
4. 1 3 5
5. 10 1 -5
6. 2 0 -3
7. -1 -8 2
8. 8 -1 -10

YOU HAVE ACID IN DE CHEST YUNN

You have acid in de chest, Yunn (indigestion).

Page 150

Coordinate grids suitable for graphing these equations are on page 151.

THE FARMER WHO NAMED HIS PET

ROOSTER
ROBINSON
BECAUSE IT
CREW SO

Page 151

This page is useful not only for graphing the equations on page 150, but also for a variety of other graphing activities.

Whom Should You See at the Bank If You Need To Borrow Money?

Use the slope and y -intercept to graph each equation below. The graph, if extended, will cross a letter. Print this letter in each box that contains the number of that exercise.

① $y = \frac{2}{3}x + 1$

② $y = \frac{1}{2}x - 3$

③ $y = -\frac{3}{4}x + 2$

④ $y = 2x - 4$

⑤ $y = -3x - 1$

⑥ $y = -\frac{3}{2}x + 3$

⑦ $y = 4x - 2$

⑧ $y = -\frac{1}{4}x + 2$

⑨ $y = \frac{5}{3}x$

THE LOAN
ARRANGER

The loan arranger
(Lone Ranger)

Page 156

O. $y = -2/5x + 2$

N. $y = -4/3x + 3$

L. $y = 2/3x - 7$

I. $y = 1/4x + 5$

A. $y = 3/5x - 1$

U. $y = -7/4x - 4$

R. $y = 2x - 7/2$

I. $y = -3x + 1/3$

S. $y = 6x - 4$

G. $y = -4/3x + 8/3$

N. $y = 5/9x + 7/9$

F. $y = 2/7x$

T. $y = 6x - 1/2$

F. $y = 1/4x + 1$

H. $y = 2/3x + 1/2$

ITS FOR HALVING
FUN

It's for halving
(having) fun.

Why Does a Poor Man Drink Coffee?

Use the slope and y-intercept to graph each equation below. The graph, if extended, will cross a letter. Print this letter in each box that contains the number of that exercise.

① $-3x + 2y = 2$

② $x - 4y = 8$

③ $2x + y = -3$

④ $2x + 3y = 6$

⑤ $3x - y = 1$

⑥ $-3x - 5y = 10$

⑦ $4x + 3y = 0$

⑧ $2x - 2y + 5 = 0$

⑨ $y - 3 = 0$

A FLYER QUACKER

A fire cracker

Page 177

These hypothetical functions will help illustrate concepts of function, slope, domain, range, and initial conditions. The questions at the bottom are suggestions. You may wish to elaborate or extend the discussion.

Page 178

You might have students individually, or as a class, sketch each of these functions BEFORE you pass out copies of this page.

Page 179

SKETCHING FUNCTIONS III

Make a sketch for each function described below. Use your knowledge of the relationships described.

(A) At a fixed price per ounce, the cost of buying gold is a function of the number of ounces you buy.

(B) The height of your head above the ground as you ride a Ferris wheel is a function of the time since you got on.

(C) The total cost of operating a lemonade stand is a function of the amount of lemonade sold.

(D) The profit from operating a lemonade stand is a function of the amount of lemonade sold.

(E) The amount of water in a pan on a burner that is turned on "high" is a function of the time since the burner was turned on.

(F) The height of a ball that is dropped from a height of 10 feet is a function of the time since it was dropped.

OBJECTIVE 1 - To sketch the graph of a function using knowledge of real-world relationships

179

Page 181

There is a coordinate grid for graphing these

equations on page 182.

1. $y = 4x$
2. $y = 1/3x$
3. $y = 2.5x$
4. $y = 1.6x$
5. $y = 2/3x$
6. $y = -5x$
7. $y = x$
8. $y = 0.75x$
9. $y = 10x$
10. $y = 0.15x$
11. $y = 22/7x$

IT WAS AN X SIGHTING MOMENT

It was an X sighting (exciting) moment.

Page 182

This page is for graphing the functions on page 181. The questions at the bottom are useful for an assignment or class discussion.

- $k = \text{rate of speed}$
- $k = \text{rate of interest}$
- $k = \pi$

Direct Variation "Grafun"

- Why does the graph of an equation expressing direct variation always pass through the origin?
- As k increases from 0.15 to 10, what happens to the graph of $y = kx$? Describe the graph when k is negative.
- What is the meaning or significance of k in the equation for Exercise 9? For Exercise 10? For Exercise 11?

182

OBJECTIVE 1-g: To graph equations expressing direct variation

Page 183

- 135
- 72
- 3.75
- 300
- 33.3
- 87.5
- 10

ANORDEREDPAIR

An ordered pair

Page 184

The exercises in the right column may provide examples to help students gain an intuitive feeling for inverse variation. In the last exercise, the constant of variation equals the approximate speed of sound in air.

SHE LOST HER
WHEY

Page 185

You may wish to use this page as a class activity, making an overhead transparency to guide discussion.

INVERSE VARIATION "GRAFUN"

Complete each table and graph the equation.

① $y = \frac{20}{x}$

x	y
1	20
2	10
4	5
5	4
10	2
20	1

② $y = \frac{12}{x}$

x	y
1	12
2	6
3	4
4	3
6	2
12	1
-1	-12
-2	-6
-3	-4
-4	-3
-6	-2
-12	-1

OBJECTIVE 1 : To graph equations expressing inverse variation.

THEIR FATHER WAS A BOAR

Their father was a boar (bore).

What Did the Toothless Old Termite Say When He Entered a Tavern ?

Graph each pair of inequalities below and indicate the solution set of the system with crosshatching or shading. The crosshatching or shading, if extended, would cover a set of three letters. Print these letters in the three boxes at the bottom of the page that contain the exercise number.

① $y \leq x - 1$
 $y \geq -3$

② $x \leq 2$
 $y \leq \frac{2}{3}x - 1$

③ $y < -x + 1$
 $y > \frac{1}{2}x - 2$

④ $y < x$
 $3x + 2y > 4$

⑤ $x - 3y \leq 12$
 $x > 2$

⑥ $y \leq 1$
 $2x + y < 1$

Famous Last Word

1 130	1 12	8 9	0.571428	7 33
-0.227	0.064	0.7	2 11	2.76
1 8	0.223	0.475	15 5	\$400
4 3		0.0625	1 11	-0.5717

A FAMOUS LAST WORD IS HIDDEN IN THE RECTANGLE ABOVE. TO FIND IT: Express each fraction below as a repeating or terminating decimal. Express each decimal as a fraction in lowest terms. Find your answers in the rectangle. Shade in each area containing a correct answer.

Express as a repeating or terminating decimal:

- ① $\frac{7}{9}$ $0.\overline{7}$
- ② $\frac{3}{8}$ 0.375
- ③ $\frac{5}{12}$ $0.4\overline{16}$
- ④ $\frac{11}{4}$ 2.75
- ⑤ $\frac{3}{11}$ $0.\overline{27}$
- ⑥ $-\frac{5}{22}$ $-0.2\overline{27}$
- ⑦ $\frac{1}{16}$ 0.0625
- ⑧ $-\frac{4}{7}$ -0.571428

Express as a fraction in lowest terms:

- ⑨ $0.\overline{8}$ $\frac{8}{9}$
- ⑩ $-0.1\overline{8}$ $-\frac{2}{11}$
- ⑪ $1.\overline{3}$ $\frac{4}{3}$
- ⑫ $-0.2\overline{1}$ $-\frac{7}{33}$
- ⑬ 0.125 $\frac{1}{8}$
- ⑭ $0.\overline{83}$ $\frac{5}{6}$
- ⑮ $-0.0\overline{83}$ $-\frac{1}{12}$
- ⑯ 0.009 $\frac{1}{111}$

OBJECTIVE 3 a To express a fraction as a repeating or terminating decimal to express a repeating decimal as a fraction in lowest terms

- $\sqrt{336}$ ft
- $\sqrt{7200}$ ft
- $\sqrt{975}$ m

INBEEFLAT

In beef flat (B flat)

Page 207

This puzzle and page 208 are identical, with

one exception. In this puzzle, all variables are assumed to represent nonnegative numbers. On page 208, all radicands, but not all variables, are assumed to be nonnegative. For this puzzle, absolute value bars are not required in answers; they are required for some answers on page 208. Use either puzzle, depending on whether you wish to teach absolute value in this type of exercise.

THEY DONT HAVE THE VEGAS IDEA

They don't have the Vegas (vague)st idea.

Page 208

Please see the note on page 207. Absolute value bars are

required for some answers. (Note that absolute value isn't used for x because x can't be negative in this case; if x were negative, the entire radicand would be negative.)

THEY DONT HAVE THE VEGAS IDEA

They don't have the Vegas (vague)st idea.
